Policy & Design Guidelines for Additions

Additions to existing structures in Local Historic Districts have a responsibility to complement the original structure. Additions should reflect the design, scale and architectural style of the original structure. The following guidelines are intended to encourage addition designs that are compatible with the existing structure, while not fully mimicking the original design.

1. All additions will be reviewed for compatibility by the following criteria:
   a. Size the relationship of the project to its site
   b. Scale the relationship of the building to those around it
   c. Massing the relationship of the building’s various parts to each other
   d. Fenestration the placement, style and materials of windows and doors
   e. Rhythm the relationship of fenestration, recesses and projections
   f. Setback in relation to setback of immediate surroundings
   g. Materials proper historic materials or approved substitutes
   h. Context the overall relationship of the project to its surroundings
