Details of Proposed Request

Existing Context
The existing structure is a 1.5 story Bungalow constructed in 1925 and listed in the Dilworth National Register of Historic Places. The site is at the corner of Brookside Avenue, East Tremont Avenue and Park Road. Adjacent residential structures are 1, 1.5 and 2 stories.

Proposal
The project is a one story addition to the right side and rear. New materials, windows and trim will match existing. A small secondary porch will be added on the right side.

Policy & Design Guidelines for Additions, page 36
Additions to existing structures in Local Historic Districts have a responsibility to complement the original structure. Additions should reflect the design, scale and architectural style of the original structure. The following guidelines are intended to encourage addition designs that are compatible with the existing structure, while not fully mimicking the original design.

2. Additions must respect the original character of the property, but must be distinguishable from the original construction.
3. All additions to the front or side of existing properties must be of a design that is sensitive to the character and massing of the existing structure.
4. Additions to the front or side of existing structures that are substantially visible from a street must go before the full Commission.
Although the main building on a lot makes the strongest statement about a property’s contribution to the character of a Local Historic District, the accessory buildings that share the lot can also have a significant impact on the streetscape. The Historic District Commission recognizes that many of the older support buildings throughout Charlotte’s older neighborhoods are inadequate to meet the needs of today’s families and businesses.

1. New garages cannot be located in front or side yards.
2. New garages must be constructed using materials and finishes that are in keeping with the main building they serve, and that are appropriate to the district.
3. Designs for new garages must be inspired by the main building they serve. Building details should be derived from the main structure.
4. Garages must be of a proper scale for the property, and must have an appropriate site relation to the main structure on a lot and to structures on surrounding properties.
5. Garage doors that are substantially visible from any street must be of a style and materials that are appropriate to the building and the district. Stamped metal and vinyl doors are considered to be inappropriate, and are discouraged.

**Staff Analysis**
The Commission will determine if the proposal meets the guidelines for garages and additions.
