**Details of Proposed Request**

**Existing Context**
The site is a corner lot at Hermitage Court and Hermitage Road. The house is a Colonial style constructed in 1913 and listed in the Myers Park National Register of Historic Places. Site features include a porte cochere with a circular driveway on the right side, mature trees and a brick wall along the side yard. The landscaping behind the wall are overgrown shrubs.

**Proposal**
The proposal is a detached one story garage on the right side that requires removal and reconstruction of a portion of the brick wall, and relocation of the driveway. The garage footprint is 24’ x 24’ and the height is approximately 15’-8”. Exterior material is brick to match the wall. Roof material is slate to match the house, garage doors are wood carriage style.

**Policy & Design Guidelines – Accessory Buildings: Garages, page 50**
Although the main building on a lot makes the strongest statement about a property's contribution to the character of a Local Historic District, the accessory buildings that share the lot can also have a significant impact on the streetscape. The Historic District Commission recognizes that many of the older support buildings throughout Charlotte’s older neighborhoods are inadequate to meet the needs of today’s families and businesses.

1. New garages cannot be located in front or side yards.
2. New garages must be constructed using materials and finishes that are in keeping with the main building they serve, and that are appropriate to the district.
3. Designs for new garages must be inspired by the main building they serve. Building details should be derived from the main structure.
4. Garages must be of a proper scale for the property, and must have an appropriate site relation to the main structure on a lot and to structures on surrounding properties.
5. Garage doors that are substantially visible from any street must be of a style and materials that are appropriate to the building and the district. Stamped metal and vinyl doors are considered to be inappropriate, and are discouraged.

**Staff Analysis**
The Commission will determine if the proposal meets the guidelines for accessory buildings.
