LOCAL HISTORIC DISTRICT:  Wilmore

PROPERTY ADDRESS:  224, 228, 232, and 236 West Kingston Avenue

SUMMARY OF REQUEST:  New Construction

APPLICANT/OWNER:  Bobby Drakeford

The application was denied May 8, 2019, for its failure to meet guidelines: Setback, 6.2; Spacing 6.3; Massing 6.5; Height and Width 6.6; Scale 6.7; Roof Form and Materials 6.10; Porches 6.14; Size 6.2 and 3; Context 6.1 through 16; and Landscaping 8.1 through 11.

Details of Proposed Request

Existing Conditions
The four properties are one story structures that were re-used for a day care. The buildings are connected with heated space. 236 West Kingston Ave. was constructed in 1923 and connected to 232. 228 and 224 were also connected to make one building and were constructed in 1936 and 1940 respectively. A 365-Day Stay of Demolition was approved by the HDC September 13, 2017. Adjacent structures are commercial and single family (one story) on the block. Across the street are single and multi-family buildings. The historic multi-family building at 241 West Kingston Avenue was constructed in 1949, the height is approximately 32’ measured from grade. Its adjacent single-family house (245 West Kingston Avenue) was constructed in 1954, approximate height is 33’. The single-family house at 251 West Kingston Avenue was constructed in 1936 with a pre-Historic District rear addition height of approximately 40’.

Proposal
The proposal is new construction of townhouses. The original zoning R-22MF allowed for the construction of townhome units. The parcels were recently rezoned to a more urban residential district, UR-2. Front setback of Buildings A and B is 67'-0" from back of curb to front thermal wall. Front setback of Building C is 66'-0" from back of curb to front thermal wall. Site features include a 5’ side yard and brick pillar/wood fence along the single-family side, and either a 15-foot landscaped buffer or 11.25’ buffer with wood fence behind the alley easement in the rear yard. Existing and proposed trees are noted on the site plan.

Policy & Design Guidelines for New Construction, page 6.1
Charlotte’s historic districts’ distinctive character is derived not only from architectural style but also from the nature of the street created by building setback, spacing, mass and height as well as the landscape quality. This street character and the surrounding properties are considered to be the context for any new building. As such, the block in which the new site is located should be carefully studied when designing a new infill dwelling. This context should include both sides of the subject street.

The Charlotte Historic District Commission will not specify a particular architectural style or design for new construction projects. The scale, mass and size of a building are often far more important than the decorative details applied. However, well designed stylistic and decorative elements, as well as building materials and landscaping, can give new construction projects the attributes necessary to blend in with the district, while creating a distinctive character for the building.
The criteria in this section are all important when considering whether a proposed new building design is appropriate and compatible. **All criteria should be taken into consideration in the design process** with the goal to ensure that the new design respects its historic neighboring buildings.

Zoning along the edges of some areas of the historic districts allows larger, multifamily or commercial buildings. To minimize their impacts on neighboring historic dwellings the HDC shall enforce the design guidelines through scale reducing techniques. Designing these structures to minimize their impacts on neighboring historic dwellings is a challenging exercise. Scale-reducing techniques such as dividing the elevation elements into **smaller bays, varying building planes, breaking up roof masses**, using multiple materials, and taking clues from nearby historic buildings are essential to reducing the negative impacts of these larger structures. All New Construction projects are evaluated based on the project’s relationship to its surroundings (Context) and how the project relates internally to its site (Details).

*All projects should use this summary checklist to ensure a submittal addresses all the new construction criteria.*

**Staff Analysis**
Staff has the following concerns with the proposal:

1. Building A, width and front gable roof pitch. Missing right elevation for building A.
2. Building B, left elevation fenestration. Missing right elevation for Building B.
3. Building C right elevation massing and fenestration. Missing left elevation for Building C.
4. Window header heights on Buildings B and C, particularly on the second level front elevations.
5. Depth of porches is 6'-0".

Lots to be combined and then parceled for townhouse ownership

Existing Zoning:
R-22 MF
19 units by right once combined

Rezoning:
UR - 2(CD)
16 units proposed

0.89 acres (16 units) = 17.9 units per acre

0.21 acres (4 units) = 18.8 units per acre

Front Setback
- Proposed Heated: +/- 66'
- Existing Heated: +/- 55'-4"
- Steps back into neighborhood
- Porch depth: 6'-0"

Rear Yard
- Proposed: 15'-0"

Side Yard
- Proposed: 5'-0"
**PLANTINGS (PROPOSED)**

Existing trees to remain:
- 22" Oak
- 13" Maple
- 26" Oak
- 14" Poplar (street tree)
- 18" Poplar (street tree)
- 20" Hardwood

Plants to be planted:
- (3) 2"-2.5" cal., 12'-14' street trees
- (7) evergreen trees
- (11) deciduous trees
- (16) cypress/arboretum (potentially on rear properties)

Scale Reduction Strategies:
• Lower roof eave
• Window details
• Porches (at varying heights)

• Variation in roof line
• Variation in material
• Variation in texture
• Fenestration
• Variety of building
DIRECTIONAL EXPRESSION

- Square
- Horizontal
- Color variation to make expression of larger buildings more square

FRONT BUILDINGS - W. KINGSTON ELEVATION

BACK BUILDINGS - W. KINGSTON ELEVATION
DIRECTIONAL EXPRESSION

- Square
- Horizontal
- Color variation to make expression of larger buildings more square
ROOF FORM & MATERIALS

- Front gable
- Hip
- Lower eave covering porch
- Full story dormer
- Architectural shingles at roof
CORNICES & TRIM

- Similar to nearby existing materials and profiles
- Craftsman features such as brackets and tapered columns
- Flat trim profiles to mimic features of nearby structures
DOORS & WINDOWS

- Similar size/composition of nearby structures
- Ratio of solid/void and rhythm similar to neighboring homes
- 3 over 1 double sash windows with interior/exterior fixed muntins
- Detailing varies for brick field vs. siding field

Window in a brick field

Window in a siding/shingle field
MATERIALS

- Brick (Modular)
- Horizontal Siding (Hardie Artisan or Nichiha)
- Shake Siding (Hardie or Nichiha)
- Trim (Hardie Artisan)
- Architectural Shingle Roofs
