Comments:

Plan does not note the number of containers they plan to have.

Also, plan indicates that “Location of combined dumpster and recycling enclosures; should future owner/HOA opt to terminate roll out service”. I am not sure what type of service they have now, but they would not be eligible for City rollout cart service if all units are constructed because that would put them over the maximum of 30 units serviceable on rollout cart service. If they exceed 30 units, they will only be able to have dumpster service from the City of Charlotte or would have to hire a private hauler.

Other issues:

None
