SITE DATA TABLE

Tax Parcel: 231-131-07 (a portion of)
Site Area: 14.449 +/- acres
Existing Zoning: R-3
Proposed Zoning: INST (CD)
Proposed Uses: Dependent/Independent Living Facility
Maximum Number of Units/Beds:
Independent Living: 106/163
Assisted Living: 44/52
Memory Care: 24/28
Total: 174/243
Density: 13.01 DUA
Maximum Square Footage: 232,400 GSF
Floor Area Ratio: .4
Maximum Building Height: 40 feet
Required Parking Spaces: 186

DEVELOPMENT STANDARDS

General Provisions

These Development Standards form a part of the Technical Data Sheet associated with the Rezoning Petition filed by Singh Development LLC, to allow the development of a facility to accommodate dependant and independent living units as well as memory care units on the approximately 14,449 acre site located at the southeast corner of the intersection of Providence Road and Providence Country Club Drive extension (the "Site"). The Site is currently zoned R-3 and the purpose of this Petition is to request rezoning to the Institutional INST (CD) district.

Development of the Site will be governed by the Technical Data Sheet, these Development Standards and the applicable provisions of the City of Charlotte Zoning Ordinance (the "Ordinance"). Unless the Technical Data Sheet or these Development Standards establish more stringent standards, the regulations established under the Ordinance for the INST Zoning District shall govern all development taking place on the Site.

The development depicted on the Technical Data Sheet is intended to reflect the arrangement of the maximum number of buildings proposed on the Site. The Petitioner has also provided a Conceptual Site Plan and a Conceptual Perspective Rendering which accompany the Technical Data Sheet. Inasmuch as planning for the proposed development of the Site has not yet advanced beyond the formative stage, the ultimate layouts of the development proposed, the configurations and placements of open space areas and buildings, and the heights and masses of buildings have not yet been determined. As a consequence, the configurations, placements, and sizes of the buildings and open space areas depicted on the Technical Data Sheet and the Conceptual Site Plan and the designs of the elevations depicted on the Conceptual Perspective Rendering are schematic in nature and are subject to refinements as part of the total design process. They may, therefore, be altered or modified during design development and construction document phases so long as the maximum building envelope lines and intensity limitations established on the Technical Data Sheet are not violated and the proposed alterations or modifications do not exceed the parameters established under these Development Standards and under the Ordinance for the INST Zoning District. However, any alterations or modifications which, in the opinion of the Planning Director, substantially alter the character of the development or significantly alter the Conceptual Site Plan or its respective conditions as well as any changes which increase the intensity of development shall not be deemed to be minor and may only be made in accordance with the provisions of Subsections 6.207(1) or (2) of the Ordinance, as applicable.

1. Permitted Uses

The Site may be devoted to Dependent Living Facility and Independent Living Facility uses along with accessory uses which are permitted under the Ordinance.

2. Transportation

- Vehicle access to the Site shall be as generally depicted on the Technical Data Sheet. The placements and configurations of vehicular access points are subject to any minor modifications required to accommodate final site and construction plans and designs and to any adjustments required for approval by the Charlotte Department of Transportation ("CDOT") and/or the North Carolina Department of Transportation ("NCDOT") including alterations to accommodate any right of way needs and/or construction easements.
- Petitioner shall construct an extension of Providence Country Club Drive east of Providence Road as a public road extending from Providence Road approximately 600 feet in an easterly direction as generally depicted on the Technical Data Sheet. The Petitioner will be responsible for all costs associated with the design and construction of these improvements, and all other associated intersection and roadway modifications required as a result of these improvements, including but not limited to: utility relocations, traffic signal modifications, pavement markings, engineering, permitting, project administration, landscaping, street trees, and right-of-way acquisition and dedication. The design of these improvements must meet applicable requirements as determined by CDOT and be subject to its review and approval.

3. Architectural Standards

- The Conceptual Perspective Rendering is intended to describe the conceptual architectural theme proposed for the Site. However, as noted in the General Provisions Section above, the rendering is conceptual in nature. Accordingly, the architectural concept may be altered or simplified during design development and construction phases, subject, however, to the provisions of Subsection 6.207(1) or (2) of the Ordinance as applicable.
 - Expanses of blank walls exceeding 20 feet in length will be eliminated throughout the use of various design elements.
 - Dumpster areas will be enclosed on all four sides by an opaque wall with one side being a hinged opaque gate. If one or more sides of a dumpster area adjoin a side wall or rear wall of a building, then the side wall or rear wall may be substituted for a side.
 - All roof mounted mechanical equipment will be screened from view from adjoining public rights-of-way and abutting properties as viewed from grade.
- ##### 4. Streetscape and Landscaping
- Internal areas of the Site will be landscaped in accordance with the requirements of the Ordinance.
 - Except as otherwise provided in these Development Standards, the streetscape treatment along public streets will meet or exceed the standards of the Ordinance and include large maturing trees, supplemental shrubbery, sidewalks of at least six feet in width and planting strips of at least 8 feet in width. Sidewalks may meander to preserve existing trees.
 - p Meter boxes, back flow preventors, and similar items will be screened from public view.
 - All other screening and landscaping shall conform to the standards of the Ordinance.

- Signs**
Signage shall comply with the requirements of the Ordinance.

6. Lighting

- The maximum height of any freestanding light fixtures erected on the Site shall not exceed fifteen (20) feet.
- All freestanding lighting fixtures installed within the Site shall be shielded with full cut-off fixtures, capped and downwardly directed.
- Wall-pak lighting will be prohibited throughout the Site.

8. Amendments to Rezoning Plan

Future amendments to the Technical Data Sheet, other sheets accompanying the Petition and these Development Standards may be applied for by the then Owner or Owners of the Parcel or Parcels within the Site involved in accordance with the provisions of Chapter 6 of the Ordinance.

9. Binding Effect of the Rezoning Documents and Definitions

- If this Rezoning Petition is approved, all conditions applicable to development of the Site imposed under these Development Standards and the Technical Data Sheet will, unless amended in the manner provided under the Ordinance, be binding upon and inure to the benefit of the Petitioners and the current and subsequent owners of the Site and their respective successors in interest and assigns.
- Throughout these Development Standards, the terms, "Petitioners" and "Owner" or "Owners" shall be deemed to include the heirs, devisees, personal representatives, successors in interest and assigns of the Petitioners or the Owner or Owners of the Site from time to time who may be involved in any future development thereof.
- Any reference to the Ordinance herein shall be deemed to refer to the requirements of the Ordinance in effect as of the date this Rezoning Petition is approved.
