Attachments: Bus Shelter and Pad Spec

I. SUMMARY REMARKS:

The Petitioner is requested to provide 40 spaces for use as an express bus park and ride, construct a shelter pad with pedestrian access to the parking spaces, and provide access easements for bus travel to circulate between the parking spaces and Providence Road.

The location of the stop is flexible, but should be located where an accessible pedestrian route to a primary entrance of the mall is provided via proposed internal sidewalks. For a recent example, below is a Street View image of the internal park and ride at Northlake Mall. The CATS standard for a shelter and waiting pad is also shown below.

Please contact me if there are any questions relative to this request. Thank you.
