I. SUMMARY REMARKS:

This site is currently served by a bus stop on the opposite side of Claude Freeman Drive. Planning has already started the process to upgrade this bus stop to a shelter. That CATS-funded project will include some minimal sidewalk connecting back to a driveway, since Claude Freeman Drive lacks sidewalks. Existing bus services function today as one-way loops. In 2017, when the Blue Line Extension opens, service may be expanded to the area to include new bi-directional routing. In anticipation of this future need, the petitioner is strongly encouraged to add sidewalks to the site's frontages. Without sidewalks along a through public street, CATS may be challenged to locate a new bus stop to more directly serve the expanded employment complex. There are no other requests at this time. Thank you.
