Comments:

Access to the CMUD Water System is available via the existing 16-inch and 8-inch water mains along Albemarle Road, and the existing 8-inch water main along Farm Pond Lane.

Access to the CMUD Sewer Service is available from the existing 27-inch gravity sewer main to the east side of Parcels running along the stream, as well as the existing 8-inch gravity sewer main along Farm Pond Lane.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. It does not imply available capacity in lines, pump stations, or treatment facilities.
