

**Petition No: 2015-069**

---

**RECOMMENDATION**

We have the following comments that are critical to CMS' support of this petition:

Adequacy of existing school capacity in this area is a significant problem. We are particularly concerned about rezoning cases where school utilization exceeds 100% since the proposed development will exacerbate this situation. Approval of this petition will increase overcrowding and/or reliance upon mobile classrooms at the schools listed below.

The total estimated capital cost of providing the additional school capacity for this new development is \$161,000 calculated as follows:

Elementary School: **4** \$20,000 = \$80,000

High School: **3** x \$27,000 = \$81,000

CMS recommends the petitioner schedule a meeting with staff to discuss any opportunities that the petitioner/developer may propose to improve the adequacy of school capacity in the immediate area of the proposed development.

**TOTAL IMPACT FROM PROPOSED DEVELOPMENT**

*Proposed Housing Units:* Proposed conditional district request seeks to allow 72 multi-family apartments in 4.29 acres, at a density of 17 units per acre under R-17MF (CD) zoning.

*CMS Planning Area:* 14

*Average Student Yield per Unit:* 0.1255

This development will add nine student(s) to the schools in this area.

The following data is as of 20<sup>th</sup> Day of the 2014-15 school year.

**INCREMENTAL IMPACT FROM PROPOSED DEVELOPMENT\***

*Existing number of housing units allowed:* Subject property is currently vacant. The subject property was rezoned as part of an overall 26 acres via Petition 2001-54. The 4.29 acre subject property included in the current rezoning petition would allow approximately 45,156 square feet of office/retail uses under NS zoning.

*Number of students potentially generated under current zoning:* None

The development allowed under the existing zoning would generate zero (0) students, while the development allowed under the proposed zoning will produce nine (9) student(s). Therefore, the net change in the number of students generated from existing zoning to proposed zoning is nine (9) student(s).

*As requested, we are also providing information regarding the difference in the number of potential students from the existing zoning to the proposed zoning. Please note that this method of determining potential numbers of students from an area underestimates the number of students CMS may gain from the new development.*
