Comments: Charlotte City Code per Sec. 10-99. Rollout container collection service.

(b)

Except as provided in [section 10-100](#), rollout containers will be collected from the curb. Containers must be placed at ground level, within six feet of the curb and at least three feet away from each other or other obstacles such as mailboxes, telephone poles, automobiles, bulky items, trees, etc., or in a location specified by the solid waste service director or director's designee. A customer should use reasonable care and caution when placing a rollout container along the curb and should avoid interfering with the access to or denying the use of a sidewalk by others.

Other comments: Please be sure Solid Waste Services receives the plans for review to determine garbage and recycle cart placement. If there are any questions, please contact Solid Waste Administration, 704-432-3537.
