CDOT’s review of this rezoning petition is intended to ensure consistency with the Transportation Action Plan (TAP) which seeks to ensure that the City’s transportation network supports current and future land uses and includes streets that provide safe and comfortable mobility for motorists, pedestrians, bicyclists, and transit users.

This document is primarily for communication to Planning Department staff as part of the overall City staff analysis of the rezoning petition and includes an overall summary of the case from a transportation perspective, information on trip generation, and resolved or outstanding site plan concerns. Additional advisory information about the driveway permit process is provided for information only.

Based on our review of the petition, we offer the following information for your consideration.

Transportation Summary
To be provided prior to public hearing.

General Description
Site is located on Steele Creek Rd/HWY 160 (major thoroughfare), between Dixie River Rd (major thoroughfare) and Shopton Road West (minor thoroughfare).
Site is located in a wedge outside Route 4.

Steele Creek Area Plan
Petitioner has not submitted the traffic impact study. Study will be reviewed by NCDOT and CDOT.

Curbline
The proposed zoning district has a setback measured from an existing or proposed future curbline. The location of the future curbline will be determined prior to public hearing.
Resolved Issues
N/A

Outstanding Issues
1. The petitioner should revise the site plan to show 8 foot planting strip and 6 foot sidewalk on Steele Creek Rd along the site frontage and connecting to existing sidewalk on Steele Creek Rd at Dixie River Rd. Buffered bike lanes (3 foot buffer, 5 foot bike lane) is also part of the envisioned cross section.

2. The petitioner should revise site plan to show proposed Shopton Rd West be built as a 3 lane road with buffered bike lanes (3 foot buffer, 5 foot bike lane), 8 foot planting strip, and 6 foot sidewalk.

3. The petitioner should revise site plan to show proposed Dixie River Rd be built as a 3 lane road with 5 foot bike lanes, 8 foot planting strip and 6 foot sidewalk.

4. The petitioner has not submitted the required traffic study. CDOT will have further comments once the study is submitted and reviewed.

Also, rezoning petition 2017-019 is located on Steele Creek Rd and the traffic generated will affect the same study area. A traffic study is required for this case as well. CDOT requests both rezoning cases coordinate traffic studies and mitigations.

5. The petitioner should revise the site plan to add a note specifying dedication and fee simple conveyance of all rights of way to the City before the site’s first building certificate of occupancy is issued. CDOT requests right of way set at 2’ behind back of sidewalk.

6. The petitioner should revise the site plan to add a note specifying all transportation improvements will be approved and constructed before the site’s first building certificate of occupancy is issued or phased per the site’s development plan.

Advisory Information
The following are requirements of the developer that must be satisfied prior to driveway permit approval. We recommend that the petitioner reflect these on the rezoning plan as-appropriate.

1. According to the City of Charlotte's Driveway Regulations, CDOT has the authority to regulate/approve all private street/driveway and public street connections to the right-of-way of a street under the regulatory jurisdiction of the City of Charlotte.

2. Adequate sight triangles must be reserved at the existing/proposed street entrance(s). Two 35’ x 35’ sight triangles (and two 10’ x 70’ sight triangles on North Carolina Department of Transportation on NCDOT maintained streets) are required for the entrance(s) to meet requirements. All proposed trees, berms, walls, fences, and/or identification signs must not interfere with sight distance at the entrance(s). Such items should be identified on the site plan.

3. The proposed driveway connection(s) to public streets will require a driveway permit(s) to be submitted to CDOT (and the North Carolina Department of Transportation on NCDOT maintained streets) for review and approval. The exact driveway location(s) and type/width of the driveway(s) will be determined by CDOT during the driveway permit process. The locations of the driveway(s) shown on the site plan are subject to change in order to align with driveway(s) on the opposite side of the street and comply with City Driveway Regulations and the City Tree Ordinance.

4. All proposed commercial driveway connections to a future public street will require a driveway permit to be submitted to CDOT for review and approval.
5. Any fence or wall constructed along or adjacent to any sidewalk or street right-of-way requires a certificate issued by CDOT.

6. A Right-of-Way Encroachment Agreement is required for the installation of any non-standard item(s) (irrigation systems, decorative concrete pavement, brick pavers, etc.) within a proposed/existing City maintained street right-of-way by a private individual, group, business, or homeowner's/business association. An encroachment agreement must be approved by CDOT prior to the construction/installation of the non-standard item(s). Contact CDOT for additional information concerning cost, submittal, and liability insurance coverage requirements.
