

REQUEST	Current Zoning: I-1 (light industrial) Proposed Zoning: I-1 TS-O, (light industrial, transit supportive overlay, optional) with 5-year vested rights
LOCATION	Approximately 4.39 acres located on the north side of West Tremont Avenue between South Tryon Street and Toomey Avenue. (Council District 3 - Mayfield)
SUMMARY OF PETITION	The petition proposes to allow the development of 74 residential townhomes for a density of 17 dwelling units per acre on a vacant lot just outside of South End and 0.60 miles from the East/West Boulevard Station.
PROPERTY OWNER PETITIONER AGENT/REPRESENTATIVE	Various Carolina Capital Investment Partners Jeff Brown & Keith MacVean, Moore & Van Allen, PLLC
COMMUNITY MEETING	Meeting is required and has been held. Report available online. Number of people attending the Community Meeting: 6

STAFF RECOMMENDATION	<p>Staff recommends approval of this petition upon resolution of outstanding issues related to site design and technical revisions.</p> <p><u>Plan Consistency</u> The petition is consistent with the <i>New Bern Transit Station Area Plan</i> recommendation for residential land uses.</p> <p><u>Rationale for Recommendation</u></p> <ul style="list-style-type: none"> • The subject site is just outside of the 1/2 mile walk from the East West Transit station on the Lynx Blue Line. • The transit supportive overlay will allow for a transit supportive residential development in an urban form and at a scale that is appropriate in an urban development. • The proposal supports pedestrian and streetscape design by placing units that front along West Tremont Avenue and by adding an eight-foot planting strip and six-foot sidewalk. • This petition will help support the transition of the area to a more walkable transit district.
---------------------------------	--

PLANNING STAFF REVIEW

- **Proposed Request Details**
The site plan accompanying this petition contains the following provisions:
 - Development of 74 residential dwelling units within 18 buildings.
 - 15-foot building setback from the future back-of-curb along West Tremont Avenue.
 - Eight-foot planting strip and six-foot sidewalk along West Tremont Avenue.
 - Internal two-way alley system for vehicular traffic to access proposed units with six-foot internal sidewalk system.
 - Conditional notes listing proposed building materials, such as brick, stucco, pre-cast concrete, EIFS, decorative block. Vinyl and aluminum may only be used on windows, soffits and hand rails.
 - Proposed roof pitch of 5: 12, and roof materials will be architectural asphalt shingles or metal roof material.
 - Proposed buildings will be limited to 160 feet in length.
 - End units facing the private alleys will not have blank walls that exceed 20 feet in length on all levels, and will have no less than four windows.
 - 10-foot landscape area and six-foot vinyl fence in the rear yard adjacent to the existing single family homes.
 - Units abutting West Tremont Avenue will be raised from the average sidewalk grade a minimum of 18 to 24 inches.
 - Minimum 3,000 square foot open space area for development.
 - Minimum two-car garages for proposed units.

- Potential storm water area to be landscaped.
- Detached lighting will be limited to 16 feet in height.
- Optional Provisions for the following:
 - Site shall be allowed to exceed the maximum amount of required off-street parking. The standards require that residential uses have a maximum of two spaces per unit.
- **Existing Zoning and Land Use**
 - The subject property is zoned I-1 (general industrial) and developed with industrial warehouse structures.
 - The property to the north of the site is zoned R-5 (single-family) and developed with residential single family homes.
 - The properties to the south, east and west are zoned TOD-M (transit oriented development – mixed-use), I-1 (light industrial) and I-2(CD) (general industrial, conditional) and developed with industrial warehouse structures or are vacant.
 - See “Rezoning Map” for existing zoning in the area.
- **Rezoning History in Area**
 - Since the construction of the LYNX Blue Line and the light rail station at the East/West Boulevard Transit Station, there have been several rezonings to conventional TOD-M (transit oriented development – mixed-use) and TOD-M(CD) (transit oriented development – mixed-use, conditional) in the area. These rezonings have supported the transition of the area to a more walkable, transit supportive district.
- **Public Plans and Policies**
 - The *New Bern Transit Station Area Plan* (2008) recommends multi-family residential up to 22 units per acre for the subject site and surrounding properties.
- **TRANSPORTATION CONSIDERATIONS**
 - The site is located at the intersection of a major thoroughfare and a local street that transitions to a major collector across the signalized intersection. While the area plan did not envision bike lanes on this street, this petition’s request to transition to residential and current guidance about bike facilities drives CDOT’s outstanding request for future back of curb dimension beyond the area plan dimension to accommodate a future bike lane. Additionally, CDOT continues to request dedication of right-of-way to back of proposed sidewalk.
 - See Outstanding Issues, Note 2 and 3.
 - **Vehicle Trip Generation:**
 - Current Zoning:
 - Existing Use: 130 trips per day (based on 20,400 square feet of warehouse uses).
 - Entitlement: 250 trips per day (based on 43,900 square feet of warehouse uses).
 - Proposed Zoning: 500 trips per day (based on 74 units).

DEPARTMENT COMMENTS (see full department reports online)

- **Charlotte Area Transit System:** No issues.
- **Charlotte Department of Neighborhood & Business Services:** No issues.
- **Charlotte-Douglas International Airport:** No issues.
- **Charlotte Fire Department:** No issues.
- **Charlotte-Mecklenburg Schools:** The development allowed under the existing zoning would generate zero students, while the development allowed under the proposed zoning will produce three students. Therefore, the net change in the number of students generated from existing zoning to proposed zoning is three students.
 - The proposed development is not projected to increase the school utilization (without mobile classroom units) over existing conditions, and utilization will remain as follows:
 - Barringer Elementary at 121%;
 - Sedgefield Middle at 104%; and
 - Harding University High at 129%.
- **Charlotte Water:** The site has water and sewer system availability for the rezoning boundary via an existing six-inch water main along West Tremont Avenue and eight-inch sewer main located along West Tremont Avenue.
- **Engineering and Property Management:**
 - **Arborist:** No issues.
 - **Erosion Control:** No issues.
 - **Land Development:** No issues.

- **Storm Water Services:** No issues.
- **Urban Forestry:** No issues.

- **Mecklenburg County Land Use and Environmental Services Agency:** No issues.

- **Mecklenburg County Parks and Recreation Department:** No issues.

OUTSTANDING ISSUESSite and Building Design

1. Clarify compliance with the ordinance requirements in Note "8B".

Transportation

2. The petitioner should revise the site plan by relocating the proposed curb 27.50 feet from the existing centerline of road. This will comply with the area plan recommendation in addition to the future bike lane.
 3. The petitioner should revise the site plan and the transportation notes to depict and state that the petitioner agrees to allow future cross access to be preserved for such time that redevelopment occurs. This should include depicting stubs and access easements on the site plan.
