

Petition No: 2017-065

RECOMMENDATION

We have the following comments that are critical to CMS' support of this petition:

Adequacy of existing school capacity in this area is a significant problem. We are particularly concerned about rezoning cases where school utilization exceeds 100% since the proposed development will exacerbate this situation. Approval of this petition will increase overcrowding and/or reliance upon mobile classrooms at the schools listed below.

The total estimated capital cost of providing the additional school capacity for this new development is \$3,867,000 calculated as follows:

- Elementary School: **96**x\$20,000 = \$1,920,000
- Middle School: **33**x\$23,000 = \$759,000
- High School: **44**x\$27,000 = \$1,188,000

CMS recommends the petitioner schedule a meeting with staff to discuss any opportunities that the petitioner/developer may propose to improve the adequacy of school capacity in the immediate area of the proposed development.

The following data is as of 20th Day of the 2016-17 school year.

INCREMENTAL IMPACT FROM PROPOSED DEVELOPMENT*

Existing number of housing units allowed: Subject property is currently vacant. The conventional R-3 zoning allows all uses permitted in the district, which includes single family detached dwellings, and duplex units are allowed by the right on a corner lot. The approximately 11.98 acres zoned R-3 conventional would allow approximately 35.94 residential dwellings.

Number of students potentially generated under current zoning: 19 students (10 elementary, 4 middle, 5 high)

The development allowed under the existing zoning would generate 19 student(s), while the development allowed under the proposed zoning will produce 173 student(s). Therefore, the net change in the number of students generated from existing zoning to proposed zoning is 154 student(s).

As requested, we are also providing information regarding the difference in the number of potential students from the existing zoning to the proposed zoning. Please note that this method of determining potential numbers of students from an area underestimates the number of students CMS may gain from the new development.
