## Revision Log:

Date	Description
11-17-17	First Review
12-14-17	Second Review

## General Review Information

The site is on Alleghany St (minor thoroughfare) and Sam Futrell (major collector carrying neighborhood shuttle route 235 (Jackson Park)) and is located in a corridor inside Route 4. There is a City funded project to add bike lanes and sidewalk along Alleghany St. CMS property along site frontage needs to be addressed to provide adequate access.

---

*CDOT's review of this rezoning petition is intended to ensure consistency with the Transportation Action Plan (TAP) which seeks to ensure that the City's transportation network supports current and future land uses and includes streets that provide safe and comfortable mobility for motorists, pedestrians, bicyclists, and transit users.*

*This document is primarily for communication to Planning Department staff as part of the overall City staff analysis of the rezoning petition and includes an overall summary of the case from a transportation perspective, information on trip generation, and resolved or outstanding site plan concerns. Additional advisory information about the driveway permit process is provided for information only.*

---

Based on our review of the petition, we offer the following information for your consideration.

## Transportation Summary

The site is located between a minor thoroughfare and a major collector. The site plan commits to a local street network that supports internal and cross connections. However, CDOT continues to request commitment to construct pedestrian improvements to support likely pedestrian activity related to the adjacent local bus routes and high school. Additionally, the primary access for this site appears to be along Alleghany but the current site plan does not reflect that access across the adjacent property (owned by CMS) has been secured. This is critical to adequate access and streetscape improvements to support this development.

## Trip Generation

Scenario	Land Use	Intensity	Trip Generation (vehicle trips/day)	Source
Existing Use	Single Family	1 dwelling	15	Tax Record
Entitlement with Current Zoning	Warehouse (17.27 acres of I-1)	172,700 sf	610	General Guidance from Planning
Proposed Zoning	Apartments	196 dwellings	1,310	Site Plan: 12-11-17

## Outstanding Issues

- ~~1. Traffic Study A Traffic Impact Study/Transportation Technical Memorandum is not needed for the complete review of this petition.~~

~~Strikeout = Not an outstanding issue~~

# Rezoning Transportation Analysis

Petition Number: 2017-164

General Location Identifier: 06114103

2. The petitioner should revise the site plan to show the proposed Local Residential Wide connecting to Alleghany St across CMS property. Access across CMS property is critical to the adequate driveway and streetscape needed for this petition.
3. The petitioner should revise the site plan and conditional notes to specify construction of standard streetscape of 8 foot planting strip and 6 foot sidewalk across the site's frontage (Alleghany and Scott Furtrell).
4. ~~The petitioner should revise the site plan to show a local residential wide street connection across the parcel to the eastern rezoning boundary of the site.~~
5. The petitioner should revise the site plan to commit to construction of a pedestrian refuge in conjunction with the City's Alleghany bike/ped project during permitting, if approve by CDOT.
6. ~~The petitioner should revise the site plan to add a note specifying dedication and fee simple conveyance of all rights of way to the City before the site's first building certificate of occupancy is issued. CDOT requests right of way set at 2' behind back of sidewalk where feasible.~~
7. ~~The petitioner should revise the site plan to add a note specifying all transportation improvements will be approved and constructed before the site's first building certificate of occupancy is issued. The petitioner may phase transportation improvements if said improvements and phasing are explicitly described in site plan notes.~~

## Advisory Information

The following are requirements of the developer that must be satisfied prior to driveway permit approval. We recommend that the petitioner reflect these on the rezoning plan as-appropriate.

1. According to the City of Charlotte's Driveway Regulations, CDOT has the authority to regulate/approve all private street/driveway and public street connections to the right-of-way of a street under the regulatory jurisdiction of the City of Charlotte.
2. Adequate sight triangles must be reserved at the existing/proposed street entrance(s). Two 35' x 35' sight triangles (and two 10' x 70' sight triangles on North Carolina Department of Transportation on NCDOT maintained streets) are required for the entrance(s) to meet requirements. All proposed trees, berms, walls, fences, and/or identification signs must not interfere with sight distance at the entrance(s). Such items should be identified on the site plan.
3. The proposed driveway connection(s) to public streets will require a driveway permit(s) to be submitted to CDOT (and the North Carolina Department of Transportation on NCDOT maintained streets) for review and approval. The exact driveway location(s) and type/width of the driveway(s) will be determined by CDOT during the driveway permit process. The locations of the driveway(s) shown on the site plan are subject to change in order to align with driveway(s) on the opposite side of the street and comply with City Driveway Regulations and the City Tree Ordinance.
4. All proposed commercial driveway connections to a future public street will require a driveway permit to be submitted to CDOT for review and approval.
5. Any fence or wall constructed along or adjacent to any sidewalk or street right-of-way requires a certificate issued by CDOT.
6. A Right-of-Way Encroachment Agreement is required for the installation of any non-standard item(s) (irrigation systems, decorative concrete pavement, brick pavers, etc.) within a proposed/existing City maintained street right-of-way by a private individual, group, business, or homeowner's/business association. An encroachment agreement must be approved by CDOT prior to the construction/installation of the non-standard item(s). Contact CDOT for additional information concerning cost, submittal, and liability insurance coverage requirements.
