

REQUEST

Current Zoning: R-5 (single family residential)
Proposed Zoning: UR-2(CD) (urban residential, conditional)

LOCATION

Approximately 0.17 acres located at the northeast corner of E. 17th Street and N. McDowell Street.
(Council District 1 - Egleston)

SUMMARY OF PETITION

The petition proposes to develop the site to allow five single family attached dwelling units, at a density of 29.4 units per acre.

COMMUNITY MEETING

Meeting is required and has been held. Report available online.
Number of people attending the Community Meeting: 30.

**STAFF
RECOMMENDATION**

Staff does not recommend approval of this petition in its current form.

Plan Consistency

The petition is inconsistent with the *Belmont Area Revitalization Plan*, which recommends single family detached dwellings at a maximum density of five units per acre.

Rationale for Recommendation

- The proposed attached single family development is located within an established single family detached neighborhood.
- The proposed three-story multi-unit structures, and density of 29 units per acre is in excess of the adopted plan recommendation for up to five units per acre, and is not consistent with the plan's recommendation that all new and rehabilitated homes be compatible in design and character with the existing adjacent housing stock.
- The surrounding single family area has an established lot pattern with one home per lot. As currently designed, the proposed

single family attached development is not consistent with the existing residential context described above due to the attached units, and a total of five units on a lot the same size as lots containing a single home.

- The existing single-family core of the community should be preserved and rehabilitated as a whole, to protect the area's "feel" as a traditional pedestrian-oriented single-family neighborhood."
- "New construction and rehabilitation projects should be designed in a way that is compatible with the existing character of the area. Approval of this project could lead to the demolition nearby single family dwellings and requests for higher density on the homesites.
- Petition does not provide the ordinance required order for the streetscape of an eight-foot planting strip and six-foot sidewalk, in that order.

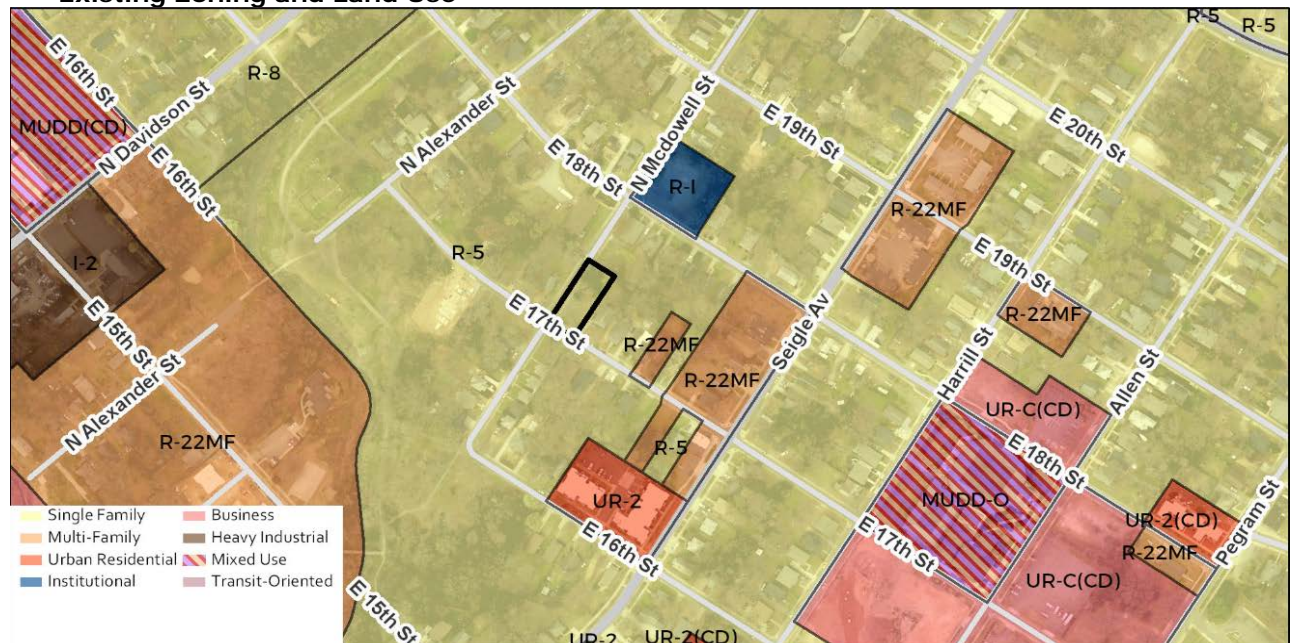

PLANNING STAFF REVIEW

• **Proposed Request Details**

The site plan accompanying this petition contains the following provisions:

- Maximum of five single family attached dwelling units limited to 40 feet in height.
- One unit will be for-sale affordable at 80% AMI, with a 10 year restriction, or in accordance with the Charlotte Housing Authority's affordable housing guidelines.
- Site vehicular access via N. McDowell Street.
- Preferred building materials consisting of brick, cedar shake, wood siding, fiber cement siding, stucco, masonry and/or other material approved by the Planning Director. Permitted roof materials include asphalt shingles, composition shingles, wood shingles, tin, standing seam metal, and wood shakes.
- Minimum six-foot sidewalk along curbside in alignment with the existing sidewalk on E. 17th Street, and an eight-foot planting strip in the remaining area between the sidewalk and the property boundary. The planting strip will be increased to eight feet in width if open space is no longer required. A six-foot sidewalk along curbside and eight-foot planting strip will be provided along N. McDowell Street.

• **Existing Zoning and Land Use**

- The subject property is vacant.
- Land uses include single family immediately surrounding, and multi-family dwellings at a further distance.

The subject property is vacant.

The surrounding properties are single family homes.

Little Sugar Creek Greenway is located nearby.

Rezoning History in Area

Petition Number	Summary of Petition	Status
2017-101	Rezoned 2.17 acres to TOD-R(O) (transit oriented development - residential, optional) to allow up to 60 single family attached dwelling units, at a density of 29.5 units per acre.	Approved
2014-023	Site plan amendment to MUDD(CD) SPA (mixed use development, conditional, site plan amendment) for 2.14 acres to reduce the total number of multi-family dwelling units from 150 to 120 and to allow units to be for rent.	Approved

Public Plans and Policies

- The *Belmont Area Revitalization Plan* (2003) recommends single family uses up to five units per acre.
- Design policies in the adopted plan recommend that new and rehabilitated homes be compatible in design and character with the existing adjacent housing stock. The existing single-family core of the community should be preserved and rehabilitated as a whole, to protect the area’s “feel” as a traditional pedestrian-oriented single-family neighborhood. New construction and rehabilitation projects should be designed in a way that is compatible with the existing character of the area.

- **TRANSPORTATION CONSIDERATIONS**

- The site is located at the intersection of two local roads. Currently the site has existing four-foot back-of-curb sidewalk on East 17th Street and no sidewalk on North McDowell Street. CDOT continues to ask for streetscape improvements to City standards of eight-foot planting strip and six-foot sidewalk, which support proposed development.
- See Outstanding Issues, Notes 2 and 3.
- **Vehicle Trip Generation:**
 - Current Zoning:
 - Existing Use: 0 trips per day (based on vacant lot).
 - Entitlement: 10 trips per day (based on one single family dwelling).
 - Proposed Zoning: 50 trips per day (based on five townhomes).

DEPARTMENT COMMENTS (see full department reports online)

- **Charlotte Area Transit System:** No outstanding issues.
- **Charlotte Department of Housing and Neighborhood Services:** No outstanding issues.
- **Charlotte Fire Department:** 20 feet unobstructed clearance on street required at all times for Charlotte Fire Department.
- **Charlotte-Mecklenburg Schools:** The development allowed under the existing zoning would generate zero students, and the development allowed under the proposed zoning will produce zero students. Therefore, the net increase in the number of students generated from existing zoning to proposed zoning is zero students.
 - The proposed development is not projected to increase the school utilization over existing conditions (without mobile classroom units) as follows:
 - Walter G. Byers PK-8 remains at 105%
 - West Charlotte High remains at 97%
- **Charlotte Water:** Charlotte Water has accessible water system infrastructure for the rezoning boundary via existing six-inch water distribution mains located along McDowell Street and 17th Street. Charlotte Water has sanitary sewer system infrastructure accessible for the rezoning boundary via an existing eight-inch gravity sewer main located along 17th Street.
- **Engineering and Property Management:**
 - **Arborist:** See Outstanding Issue, Note 9.
 - **Erosion Control:** No outstanding issues.
 - **Land Development:** No outstanding issues.
 - **Storm Water Services:** No outstanding issues.
 - **Urban Forestry:** No outstanding issues.
- **Mecklenburg County Land Use and Environmental Services Agency:** No comments submitted.
- **Mecklenburg County Parks and Recreation Department:** No outstanding issues.

OUTSTANDING ISSUESLand Use

1. Reduce the density to not exceed five dwelling units per acre.

Transportation

2. Revise the site plan to show eight-foot planting strip behind the curb and six-foot sidewalk across site frontage on East 17th Street and across site frontage on North McDowell Street.
3. Revise the site plan to add a note specifying dedication and fee simple conveyance of all rights-of-way to the City before the site's first building certificate of occupancy is issued. CDOT requests right-of-way set at two feet behind back of sidewalk where feasible.

Site and Building Design

4. Delete existing notes under the heading of "Open space" and add the following note: "Petitioner intends to comply with the 400-foot private open space requirement in Section 9.406 of the zoning ordinance if required in the UR-2 zoning district at the time of permitting."
5. Provide elevations to reflect the relationship of the buildings to the street and abutting properties.
6. Amend Note A under heading "Affordable Housing Unit" to clarify or remove "or in accordance with the Charlotte Housing Authority's affordable housing guidelines."
7. Amend Note A under "Streetscape and Landscaping" to reflect the revised minimum plating strip.
8. Amend Note A under "Architectural Standards" to replace "preferred" with "permitted."

Environment

9. Submit a tree survey for all trees two inches in diameter at breast height (DBH) or larger located in the public right of way. Tree survey may be completed by landscape architect, surveyor, or other land development professional.

REQUESTED TECHNICAL REVISIONSSite and Building Design

10. Note A under Open Space should be modified to add "except as noted under Streetscape and Landscaping."
11. Remove Note B under the heading of "Open Space" as a covered porch may not count as open space.
