Comments:

Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 6-inch and 8-inch water distribution main located along Queens Road and an existing 8-inch water distribution main located along Providence Road.

Charlotte Water has sanitary sewer system infrastructure accessible for the rezoning boundary via an existing 8-inch gravity sewer main located along Queens Road and Providence Road.

Development is encouraged to contact Installation Development Services at (704) 336-5499 to review service connection design requirements and City Ordinances (e.g., backflow, separate meter Ordinance, public/private pipeline extensions). Comments: Submit application to the Capacity Assurance Program if upsizing/adding any meters greater than 1". Contact our New Services Department for water/sewer services and dismantlements (if applicable). If adding any more buildings to the private water distribution system, then plans will need to be submitted to Charlotte Water for review/approval. According to Charlotte Water system maps, there is currently a 2.5" GSP water main that goes underneath the existing church. Please submit plans to Charlotte Water for abandonment/relocation of that main and easement.

Reservation of sanitary sewer system capacity through the Charlotte Water's Capacity Assurance Program is the responsibility of the customer/development. Contact the New Services Group at (704) 432-2854 for further information on reserving capacity up to 24 months.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. The findings do not imply available capacity in water and sanitary sewer lines, pump stations, or treatment facilities. Reservation of capacity is achieved through the Charlotte Water's Capacity Assurance Program.
