**Comments:**

Summary: Water and sewer service is accessible for this rezoning boundary.

---

Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 12-inch water distribution main located along Prosperity Ridge Road.

Charlotte Water has sanitary sewer system infrastructure accessible for the rezoning boundary via an existing 8-inch gravity sewer main located along Ridge Road and within the rezoning boundary.

Development is encouraged to contact Installation Development Services at (704) 336-5499 to review service connection design requirements and City Ordinances (e.g., backflow, separate meter Ordinance, public/private pipeline extensions). Comments: Submit application to the Capacity Assurance Program. If a public road is proposed, extension of public water/sewer will be required as a part of a donated project. Also an extension of water will be required along Prosperity Ridge Road. There is a sewer main and easement that runs through the property. No permanent structures and BMP's allowed. If proposing to grade inside our easement, it will have to be reviewed due to the age, amount of current fill, and type of pipe. Send plans to Charlotte Water for private water permitting (if applicable). Send plans to NCDEQ Mooresville Regional Office (704) 663-1699 for private sewer permitting (if applicable).

Reservation of sanitary sewer system capacity through the Charlotte Water's Capacity Assurance Program is the responsibility of the customer/development. Contact the New Services Group at (704) 432-2854 for further information on reserving capacity up to 24 months.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. The findings do not imply available capacity in water and sanitary sewer lines, pump stations, or treatment facilities. Reservation of capacity is achieved through the Charlotte Water's Capacity Assurance Program.
