Comments:

Summary: Water service is accessible for this rezoning boundary.

Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 16-inch water transmission main located along US 29.

The proposed rezoning has the potential to significantly impact the capacity of the local sanitary sewer collection system. Due to the limited project details that were provided, it is recommended that the applicant contact the Charlotte Water New Services group for further information and to discuss options regarding sanitary sewer system capacity. Charlotte Water New Services group is available at (704) 432-2854.

Development is encouraged to contact Installation Development Services at (704) 336-5499 to review service connection design requirements and City Ordinances (e.g., backflow, separate meter Ordinance, public/private pipeline extensions). Comments: Submit application to the Capacity Assurance Program. Has direct access to water. Will need to extend public sewer through a donated project. Contact our New Services Department for water service. Will need to send plans to Charlotte Water for private water permitting (if applicable). Will need to send plans to NC-DEQ Mooresville Regional Office (704) 663-1699 for private sewer permitting (if applicable).

Reservation of sanitary sewer system capacity through the Charlotte Water's Capacity Assurance Program is the responsibility of the customer/development. Contact the New Services Group at (704) 432-2854 for further information on reserving capacity up to 24 months.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. The findings do not imply available capacity in water and sanitary sewer lines, pump stations, or treatment facilities. Reservation of capacity is achieved through the Charlotte Water's Capacity Assurance Program.
