Comments:

Summary: Water service is accessible for this rezoning boundary. The proposed rezoning is located in an area that Charlotte Water has determined to have limited sanitary sewer system capacity. Sanitary sewer service will be dependent on the completion of a public infrastructure project—Charlotte Water’s Middle Little Hope Creek Project. This project was identified to support current and future customers, and any proposed sanitary sewer flow shall be coordinated to discharge after completion of said project.

Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 8-inch water distribution main located along East Woodlawn Road.

The proposed rezoning is located in an area that Charlotte Water has determined to have limited sanitary sewer system capacity. Sanitary sewer service will be dependent on the completion of a public infrastructure project—Charlotte Water’s Middle Little Hope Creek Project. This project was identified to support current and future customers, and any proposed sanitary sewer flow shall be coordinated to discharge after completion of said project. It is recommended that the applicant contact the Charlotte Water New Services at (704) 432-2854 for further information and to discuss options regarding sanitary sewer system capacity.

Development is encouraged to contact Installation Development Services at (704) 336-5499 to review service connection design requirements and City Ordinances (e.g., backflow, separate meter Ordinance, public/private pipeline extensions). Comments: Will need to acquire CAP. Has direct access to water and to sewer. Depending on the required public street network, this site may need to extend public water/sewer to serve their site. Will need to send plans to Charlotte Water for private water permitting (if applicable). Will need to send plans to NCDEQ for private sewer permitting (if applicable).

Reservation of sanitary sewer system capacity through the Charlotte Water’s Capacity Assurance Program is the responsibility of the customer/development. Contact the New Services Group at (704) 432-2854 for further information on reserving capacity up to 24 months.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. The findings do not imply available capacity in water and sanitary sewer lines, pump stations, or treatment facilities. Reservation of capacity is achieved through the Charlotte Water's Capacity Assurance Program.
