What is an Area Plan?

- **Framework for Future Growth and Development that Updates the Broader, More General District Plans**
- **Policy Guide For How the Community Should Be Maintained or Changed**
- **Policy Guide for Elected & Appointed Officials in Making Land Use, Zoning, and Capital Investment Decisions**

What Can You Expect From an Area Plan?

Clarify vision for the area

**Identify and provide policies to
address development
opportunities and issues**

But not . . .

**Create regulations
or laws**

**Identify public and private
investments needed to achieve
vision**

But not . . .

**Provide funding &
implementation
means overnight**

**Possibly recommend zoning
changes in appropriate
locations**

But not . . .

Rezone property

**Guide more appropriate
development**

But not . . .

Halt development

Purpose of the Plan

- Address key land use and transportation issues
- Reverse the trend of disinvestment
- Reinforce existing neighborhoods for continued stability and livability
- Provide guidance for future land use and infrastructure by updating the existing land use plans for this area
- Focus of the Area Plan is **NOT** to reevaluate existing plans for rapid transit or highway improvements

Community Design Policies

Residential Design Policies

Applicability:

SF - Single Family detached

AM - Single Family attached and Multi-Family

The following design policies are based on adopted General Development Policies (GDP) in 2003. Bold text indicates additional policies specific to the Independence Boulevard Area Plan.

		SF	AM
Building Architecture and Site Design	Preserve historically or architecturally significant structures.	■	■
	Avoid blank walls along pedestrian circulation areas.	■	■
Close attention to building design enhances the community. Design policies do not result in conformity of design, but provide direction for both new and infill development.	Orient building towards street (unless a thoroughfare) or common open space and provide pedestrian access to the street.	■	■
	Blend scale and setbacks of buildings with existing structures.	■	■
	Provide a variety of housing types (floor plans, exterior treatments and materials, massing, and roof forms.)	■	
	Orient buildings toward greenways and other natural areas when feasible.	■	■

Future Transportation Network

CITY OF CHARLOTTE

Pedestrian-Bike-Greenways

- **Infrastructure and Public Facilities**
 - Continue developing park and greenway systems
- **Natural Environment**
 - Protect and enhance the natural features

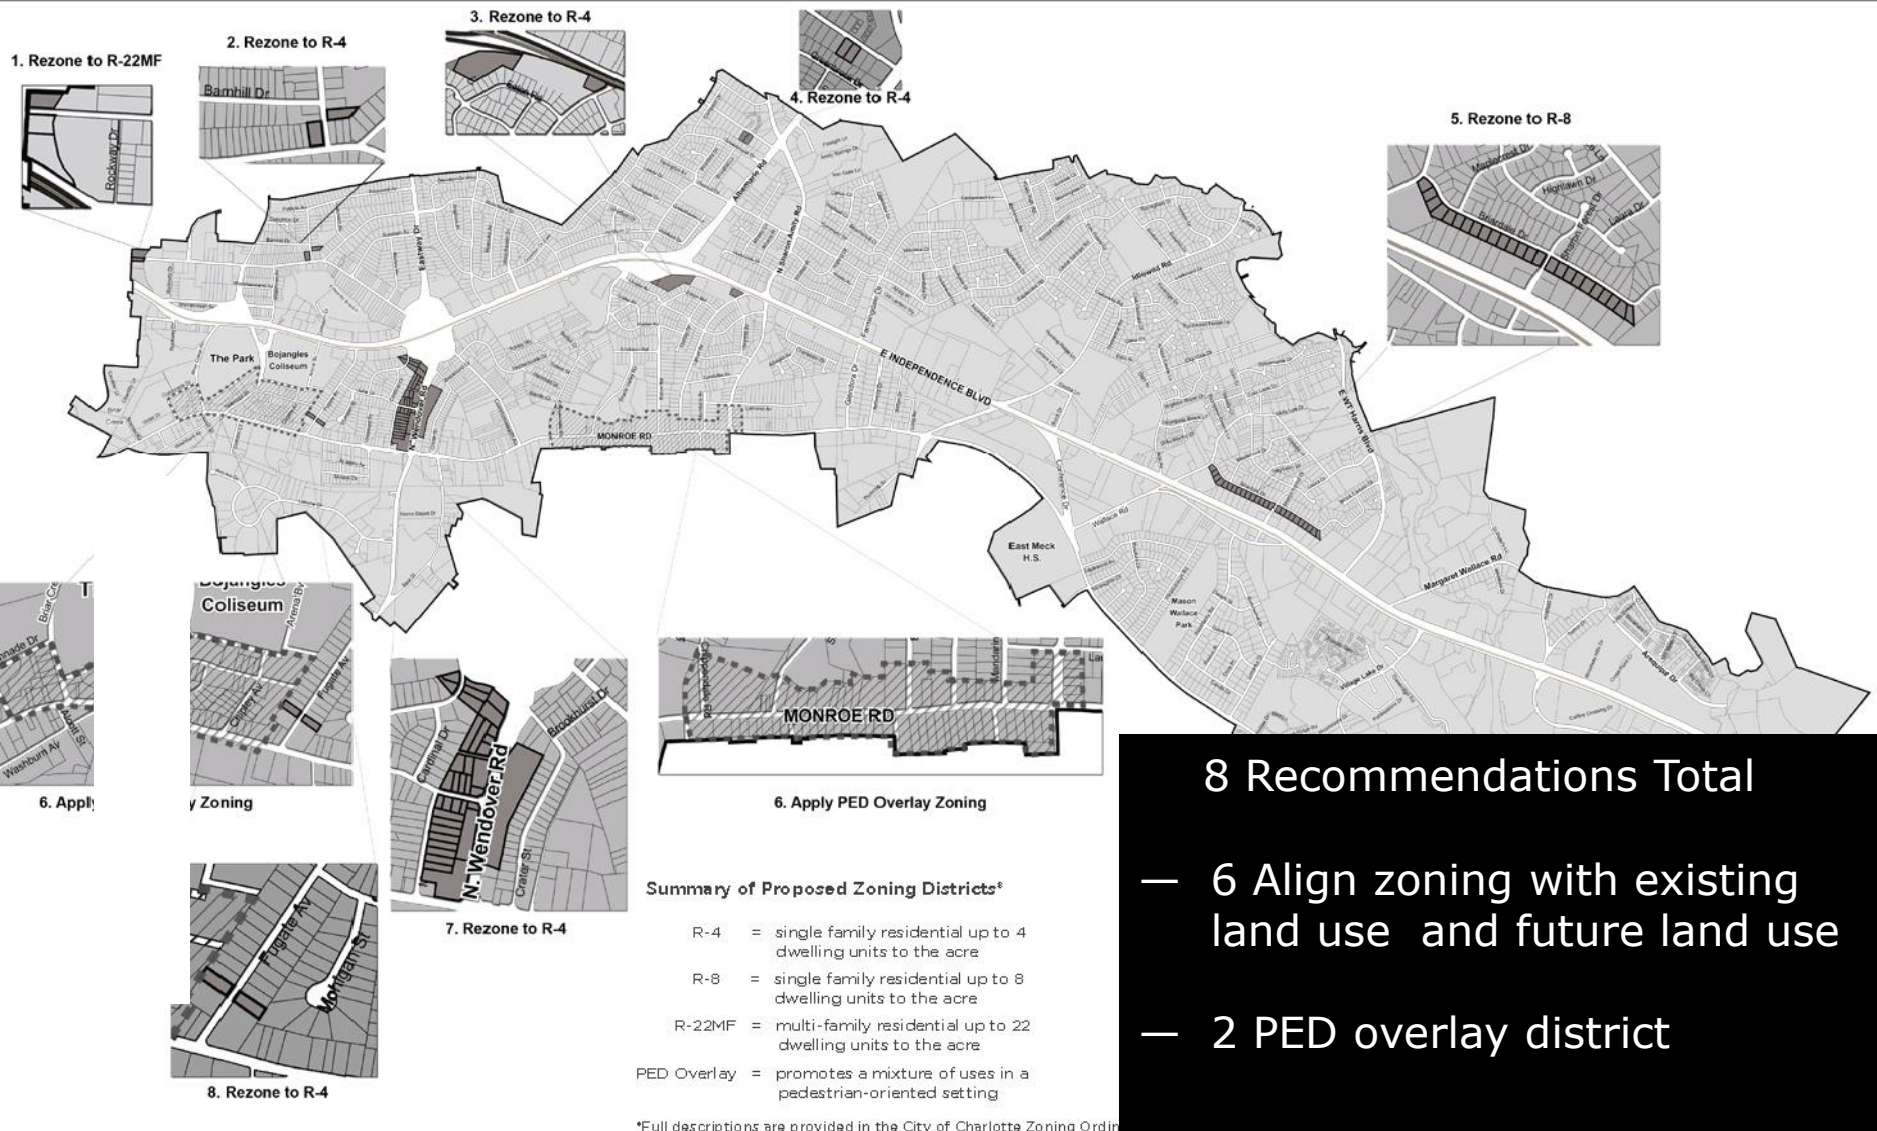

Key Implementation Strategies

Proposed Corrective Rezoning

8 Recommendations Total

- 6 Align zoning with existing land use and future land use
- 2 PED overlay district

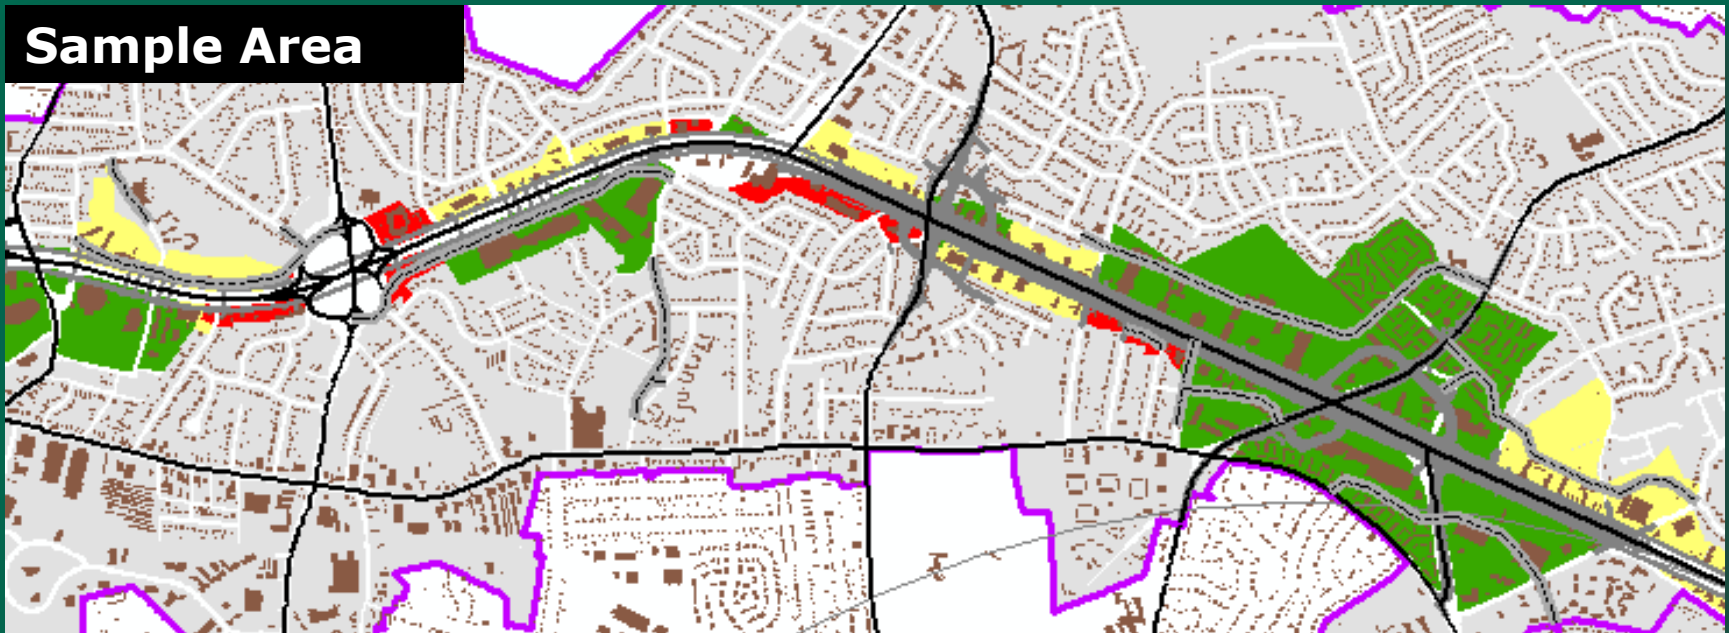

Daniel Rose Fellowship

- **Four cities selected for yearlong program of professional development, leadership training, assistance with a local land use challenge**
- **Mayor selects 3 fellows and team coordinator**
- **2010-2011 class: Charlotte, Detroit, Houston, Sacramento**

Property Acquisition Program

- Recommend City program to acquire prioritized properties from willing sellers
- Collaborate with NCDOT in U-209B project limits
- Identify properties in previous expressway section

ULI-Rose Panel Concepts

Comparing the Visions

- BRT on HOT lanes in the freeway, instead of BRT (or LRT) in the freeway
BUT Area Plan is neutral on the transit mode for Independence
- Number of Station Areas along Independence Boulevard
BUT Regional stations with most development potential remain
- Streetcar Option Along Monroe Road
BUT Walkable, pedestrian-oriented development in plan support streetcar
