INCREMENTAL IMPACT FROM PROPOSED DEVELOPMENT*

Existing number of housing units allowed: 10 multi- family units under R-22 MF zoning

Number of students potentially generated under current zoning: 1 (1 elementary student)

The development allowed under existing zoning would generate 1 student, while the development allowed under the proposed zoning will not produce any students. Therefore, the net change in the number of students generated from existing zoning to proposed zoning is 0.

As requested, we are also providing information regarding the difference in the number of potential students from the existing zoning to the proposed zoning. Please note that this method of determining potential numbers of students from an area underestimates the number of students CMS may gain from the new development.
