

Petition No: 2014-024

RECOMMENDATION

We have the following comments that are critical to CMS' support of this petition:

Adequacy of existing school capacity in this area is a significant problem. We are particularly concerned about rezoning cases where school utilization exceeds 100% since the proposed development will exacerbate this situation. Approval of this petition will increase overcrowding and/or reliance upon mobile classrooms at the schools listed below.

The total estimated capital cost of providing the additional school capacity for this new development is \$216,000 calculated as follows:

High School: $8 \times \$27,000 = \$216,000$

CMS recommends the petitioner schedule a meeting with staff to discuss any opportunities that the petitioner/developer may propose to improve the adequacy of school capacity in the immediate area of the proposed development.

TOTAL IMPACT FROM PROPOSED DEVELOPMENT

Proposed Housing Units: 13 townhome units for sale; also 33 single family detached units under UR-2 (CD) SPA zoning

CMS Planning Area: 3

Average Student Yield per Unit: 0.0417 (townhome) and 0.5833 (single family)

This development will add 20 students to the schools in this area.

The following data is as of 20th Day of the 2012-13 school year.

<i>Schools Affected</i>	<i>20th Day, 2012-13 Enrollment (non-ec)</i>	<i>Total Classroom Teachers</i>	<i>Building Classrooms/ Teacher Stations</i>	<i>20th Day, 2012-13 Building Utilization (Without Mobiles)</i>	<i>Building Classroom/ Adjusted Capacity (Without Mobiles)</i>	<i>Additional Students As a result of this development</i>	<i>Utilization As of result of this development (Without Mobiles)</i>
EASTOVER ES	467	25	26	96%	528	12	96%
ALEXANDER GRAHAM MS	1434	72.5	65	112%	1671	0	112%
MYERS PARK HS	2755	137.5	127	108%	3855	8	108%

INCREMENTAL IMPACT FROM PROPOSED DEVELOPMENT*

Existing number of housing units allowed: Vacant except for few duplex units; existing conventional site plan 63 townhome units in no more than four buildings under UR-2 (CD) zoning.

Number of students potentially generated under current zoning: 3 students (1.5 elementary, 1.5 high students)

The development allowed under the existing zoning would generate 3 student(s), while the development allowed under the proposed zoning will produce 20 student(s). Therefore, the net change in the number of students generated from existing zoning to proposed zoning is 17 student(s).

As requested, we are also providing information regarding the difference in the number of potential students from the existing zoning to the proposed zoning. Please note that this method of determining potential numbers of students from an area underestimates the number of students CMS may gain from the new development.
