RZP-2026-059: The United House of Prayer - Bishiop Madison Lane Site Rezoning Request
Air Quality Comments: e petitioner will be notified of the local dust ordinance requiring property owners, and their contractors, to minimize dust leaving their property.

MCAQ recommends using Tier 4 construction equipment, the cleanest available. The recommendation will be communicated directly to the petitioner.

Ground Water Services Comments: Executive Summary: Contamination incidents exist in the vicinity, so there may be sampling requirements for water supply wells. Septic registration records noted for various parcels in the petition.

Groundwater & Wastewater Services records indicate contamination site(s) exist on or within 1,500 feet of the properties included in the petition. An established Area of Regulated Groundwater Usage (ARGU) as defined by the Mecklenburg County Groundwater Well Regulations extends 1,500 feet around the contamination sites. Wells may be permitted with sampling requirements between 1,000 and 1,500 feet of contamination sites.

.

Groundwater & Wastewater Services records indicate a registered septic system exists on parcels 04101501, 04101508, 04101509 and 04101510 listed in the petition. No regulations govern the abandonment of septic systems; however, GWS does recommend that septic tanks be pumped by a NC Licensed Septic Hauler to remove any residual contents and then crushed and backfilled. This recommendation is made because improperly abandoned septic tanks may not be able to support the weight of vehicular traffic, structural foundations or people posing a safety hazard.

Storm Water Services Comments: There is no FEMA Floodplain on the property.

Solid Waste Comments: No comments

MCAQ Scope of Review:

Mecklenburg County Air Quality (MCAQ) has reviewed the petitions with regard to air quality regulations for stationary sources and demolition and/or renovation of structures (e.g. National Emission Standards for Hazardous Air Pollutants for asbestos). Comments may also be made regarding incompatible land uses, sources of Toxic Air Pollutants, proximity to Risk Management Plan facilities, and proximity to known nuisance conditions or sensitive populations. MCAQ has conducted the review based on information submitted by the petitioner, review of aerial photographs (as available through the Mecklenburg County Polaris system), review of the "Air Pollution Facility Information Online" database available from the MCAQ website, and review of Mecklenburg County Health Department records. The review is cursory based on limited information provided within petition applications and site plans.
