

Independence Boulevard Area Plan

Plan Development Update

March 22, 2010

Through January and February 2010, a technical team of City and NCDOT staff evaluated and recommended changes to the current Transportation Improvement project along Independence Boulevard. Staff recommendations are based on supporting the principles and integrated land use and transportation vision developed with the community during the planning process for the draft *Independence Boulevard Area Plan*.

The recommended changes will be shared with the Citizen Advisory Group in April 2010. A public meeting for the draft area plan is tentatively scheduled for late April or early May 2010. We will notify the public with specific dates and meeting locations once they have been finalized. Further information about the plan and updates about the process is available on Planning Department website at www.charlotteplanning.org.

Independence Boulevard Area Plan
