Recommendations and/or Ordinance Requirement Reminders

Storm Water Services

S.W.I.M. Stream Buffers

S.W.I.M. stream buffer requirements apply as described on the following website:

<http://charmeck.org/stormwater/regulations/Pages/SWIMOrdinances.aspx>.

In addition, the buffer requirements specified in the post-construction storm water ordinance, as described on the website indicated above, also apply. In the event that different requirements occur in the post-construction ordinance compared to the S.W.I.M. stream buffer ordinance, the more stringent will apply.

Impaired Streams:

The property represented in this rezoning is within the Doby Creek watershed, which drains to surface waters listed on North Carolinas Department of Natural Resources 303(d) list of impaired streams. Mallard Creek is listed for turbidity, ecological/biological integrity of benthos, and copper due to pollution discharges. By

properly controlling pollutants both during and after construction you can help restore these surface waters. More information on North Carolina's impaired waters and 303(d) list can be found at <http://portal.ncdenr.org/web/wq/ps/mtu/assessment>.

Air Quality

Development of this site may require submission of an asbestos Notification of Demolition and Renovation due to possible demolition or relocation of an existing structure or renovation of a load-bearing wall in an existing structure. This notification is required in accordance with the Mecklenburg County Air Pollution Control Ordinance (MCAPCO) Regulation 2.1110 - Subparagraph (a) - "National Emission Standards for Hazardous Air Pollutants". A letter of notification and the required forms will be mailed directly to the parcel owner.

Please contact the staff members who conducted the reviews if you have any questions.
