Comments:

Access to the CMUD Water System is available via the existing 126-inch water mains along Harrisburg Road and Camp Stewart Road.

Access to the CMUD Sewer Service is not currently available at parcels under review. Developer should contact Charlotte Water's New Services division for information about sewer extensions.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. It does not imply available capacity in lines, pump stations, or treatment facilities.
