Petition No: 2015-045

RECOMMENDATION

We have the following comments that are critical to CMS' support of this petition:

Adequacy of existing school capacity in this area is a significant problem. We are particularly concerned about rezoning cases where school utilization exceeds 100% since the proposed development will exacerbate this situation. Approval of this petition will increase overcrowding and/or reliance upon mobile classrooms at the schools listed below.

The total estimated capital cost of providing the additional school capacity for this new development is \$464,000 calculated as follows:

Elementary School: **8** \$20,000 = \$160,000

Middle School: **5** \$23,000 = \$115,000

High School: $7 \times 27,000 = 189,000$

CMS recommends the petitioner schedule a meeting with staff to discuss any opportunities that the petitioner/developer may propose to improve the adequacy of school capacity in the immediate area of the proposed development.

TOTAL IMPACT FROM PROPOSED DEVELOPMENT

Proposed Housing Units: Proposed conditional district request seeks to allow up to 291 multi-family dwelling units and associated accessory uses under UR-2 (CD) zoning.

CMS Planning Area: 14

Average Student Yield per Unit:

This development will add 20 students to the schools in this area.

The following data is as of 20th Day of the 2013-14 school year.

Schools Affected	Total Classroom Teachers	Building Classrooms/ Teacher Stations	20 th Day, Enrollment (non-ec)	Building Classroom/ Adjusted Capacity (Without Mobiles)	20 th Day, Building Utilization (Without Mobiles)	Additional Students As a result of this development	Utilization As of result of this development (Without Mobiles)
STEELE CREEK ELEMENTARY	40.6	33	737	630	123%	8	124%
KENNEDY MIDDLE	41.5	45	722	1018	92%	5	93%
OLYMPIC HIGH	145	90	2434	2640	161%	7	162%

INCREMENTAL IMPACT FROM PROPOSED DEVELOPMENT*

Existing number of housing units allowed: The seven subject lots are developed with five single family dwelling units and two lots vacant under R-3, R-8MF (CD), and INST (CD) zoning.

The approximately 9.45 acre site would net approximately 28.35 dwellings under R-3 zoning. And up to 31 single family attached dwelling units under R-8MF (CD) zoning.

Number of students potentially generated under current zoning: 25 students (13 elementary, 5 middle, 7 high)

The development allowed under the existing zoning would generate 27 student(s), while the development allowed under the proposed zoning will produce 20 student(s). Therefore, the net change in the number of students generated from existing zoning to proposed zoning is zero (0) student(s).

As requested, we are also providing information regarding the difference in the number of potential students from the existing zoning to the proposed zoning. Please note that this method of determining potential numbers of students from an area underestimates the number of students CMS may gain from the new development.
