Recommendations and/or Ordinance Requirement Reminders

Air Quality

The proposed project may be subject to certain air quality permit requirements in accordance with Mecklenburg County Air Pollution Control Ordinance Section 1.5200 - "Air Quality Permits." A letter of notification and copy of the regulations will be mailed directly to the petitioner by MCAQ.

Water Quality

General Comments: The requirements of the post-construction storm water ordinance for the City of Charlotte should be applied to the proposed rezoning. Detailed information regarding ordinance requirements is available at the following website: <http://charmeck.org/stormwater/regulations/Pages/Post-ConstructionStormWaterOrdinances.aspx> and click on City of Charlotte.

Impaired Streams:

The property represented in this rezoning request drains to surface waters listed on North Carolina's Department of Natural Resources 303(d) list of impaired streams. **McMullen Creek** is listed for ecological/biological integrity of benthos due to pollution

discharges. By properly controlling pollutants both during and after construction you can help restore these surface waters. More information on North Carolina's impaired waters and 303(d) list can be found at <http://portal.ncdenr.org/web/wq/ps/mtu/assessment>.

Specific Comments:

There is an existing 30' Storm Water Post Construction Buffer running through the property.

No further comments on the above petition at this time.

Please contact the staff members who conducted the reviews if you have any questions.
