

SECOND COMMUNITY MEETING REPORT
Petitioner: Aldersgate at Shalom Park, Inc.
Rezoning Petition No. 2019-040

This Community Meeting Report is being filed with the Office of the City Clerk and the Charlotte-Mecklenburg Planning Commission pursuant to the provisions of the City of Charlotte Zoning Ordinance (“Ordinance”).

PERSONS AND ORGANIZATIONS CONTACTED WITH DATE AND EXPLANATION OF HOW CONTACTED:

A representative of the Petitioner mailed a written notice of the date, time and location of the Community Meeting to the individuals and organizations set out on Exhibit A attached hereto by depositing such notice in the U.S. mail on May 3, 2019. A copy of the written notice is attached hereto as Exhibit B.

DATE, TIME AND LOCATION OF MEETING:

The Community Meeting was held on May 9, 2019 at 6:30 PM at Gorelick Hall at Shalom Park, which is located at 5007 Providence Road, Building A, Charlotte, NC 28226.

PERSONS IN ATTENDANCE AT MEETING (see attached copy of sign-in sheet):

The Community Meeting was attended by those individuals identified on the sign-in sheet attached hereto as Exhibit C. The Petitioner was represented at the Community Meeting by Barry Bobrow, Foundation of Shalom Park – Owner; Suzanne Pugh and Boris Henderson, Aldersgate at Shalom Park, Inc. – Developer; Nick Tosco, Poyner Spruill LLP – Attorney; and Matt Langston, Landworks Design Group, P.A. – Landscape Architect, Craig Kimmel, RLPS Architects – Architect. The City of Charlotte Planning Department was represented by David Pettine and John Kinley, and the Charlotte Department of Transportation was represented by Felix Obregon.

SUMMARY OF PRESENTATION/DISCUSSION:

An agenda for the Community Meeting, which is attached hereto as Exhibit D, was handed out to the attendees. The Petitioner’s representatives utilized a PowerPoint presentation, a copy of which is attached hereto as Exhibit E. The Community Meeting was called to order by Barry Bobrow, on behalf of the owners, Foundation at Shalom Park, Inc. and Temple Israel (inc.), and the developer Aldersgate at Shalom Park, Inc. (collectively, the “Petitioners”), at approximately 6:40 p.m. Mr. Bobrow welcomed the attendees and then the representatives listed above introduced themselves. Mr. Bobrow asked how many of the attendees were members of the Jewish Community Center (JCC) and almost all of the attendees stated that they were members. Mr. Bobrow began by apologizing for any miscommunications that have occurred with neighbors and members of the JCC, and stating that the Petitioners intent is to be good neighbors and keep the lines of communication strong moving forward. Mr. Bobrow explained that the intention of this meeting is to update everyone on the changes to the rezoning request and the site plan since the last community meeting.

Suzanne Pugh then provided background information about the unmet need for senior living in Charlotte, especially for the Jewish community, and described how the project was designed to minimize impacts on the community and the neighbors. Ms. Pugh explained that there are more and more seniors looking for communities like the one proposed here because of the aging population and how there is no senior living community like the one proposed here between Richmond and Atlanta. Ms. Pugh also explained that project was specifically designed to integrate programming with the organizations on Shalom Park, so that most of the residents’ activity will be kept internal to the campus, with only occasional trips to doctor appointments or special events. The major activities for senior residents (e.g., dining, exercise, activities, etc.) are all located on-site, which alleviates the need for vehicular trips. While residents may have cars, Ms.

Pugh explained that the typical resident (75-85 years old) will use such vehicles only infrequently due to their age and due to the internal capabilities of the development, which will allow such residents to get to Shalom Park via walking, golf cart, etc.

Boris Henderson then discussed the progress made since the first Community Meeting on engaging the community and soliciting feedback. Mr. Henderson commended the neighbors for organizing so quickly and meeting with the Petitioners' representatives prior to this second community meeting to provide feedback and questions concerning the rezoning site plan. Mr. Henderson also announced the email address that the neighborhood group is using to solicit feedback from neighbors (LDZONINGRESPONSE@GMAIL.com) and explained how there is an online survey that interested neighbors can fill out to provide their input and thoughts. Mr. Henderson explained that the Petitioners have also been meeting and communicating with the City on the rezoning site plan and are planning to submit a revised rezoning application and site plan on May 13, 2019. Finally, Mr. Henderson reemphasized that the Petitioners' goal was to go above and beyond what the City requires as part of the rezoning process in terms of meeting with the residents and neighbors because the Petitioners intend to be a good neighbor and really listen to all of the comments and feedback of the residents who live near the project.

At this point, Matt Langston, the landscape architect for the project, discussed the changes that been made to the Site plan since the first Community Meeting. Using slides from the PowerPoint attached hereto as Exhibit E, Mr. Langston explained that the Petitioners have decided to reduce the maximum height for the two Independent Living (IL) buildings closest to Jefferson Drive residents (who live on the same side of Jefferson Drive as where the development will be) to three stories over parking (down from the five stories over parking shown on the original rezoning site plan submitted to the City) based on feedback received from residents and nearby neighbors. The remaining three IL buildings would have a maximum height of four stories over parking. This new configuration would reduce the density from 150 units to 126 units.

Mr. Langston also discussed several accommodations and changes to the site plan that the Petitioners have made regarding transportation and pedestrian safety. First, the Petitioners have decided to remove the street/driveway that exits/enters onto Jefferson Drive from the Site at the request of the neighbors since it's not required by the Ordinance. Second, the Petitioners have agreed to work on extending the sidewalk along Jefferson Drive beyond the Site all the way to Armstrong Drive. Lastly, the Petitioners have agreed to work with the City and the State on installing traffic calming devices (e.g., speed bumps) along Jefferson Drive in order to increase pedestrian safety and decrease traffic accidents.

Mr. Langston concluded his presentation by listing the other items that the Petitioners have agreed to do in order to minimize any impacts from development, including but not limited to additional screening substantially above what the City requires, additional hardwood tree plantings along Jefferson Drive for future canopy, adding curb and gutter to Jefferson Drive, and limiting construction traffic on Jefferson Drive only to when it's necessary to actually work on the area adjacent to Jefferson Drive.

Then one of the staff representatives from the Planning Department, Dave Pettine, presented information on the rezoning process that is conducted by the City for a project such as this one. Using the PowerPoint attached hereto as Exhibit E, Mr. Pettine explained why rezoning approval is required by the City, the important dates during the process, and how neighbors can make their opinion heard by the City and the Petitioners.

Mr. Henderson concluded the presentation portion of the meeting by again thanking everyone for coming, encouraging everyone to continue to communicate with the Petitioners about questions or concerns, and reminding the neighbors of the email address that the neighborhood group is using to solicit feedback from neighbors (LDZONINGRESPONSE@GMAIL.com), and as well as the online survey that interested neighbors can fill out to provide their input and thoughts.

The attendees then asked questions to the Petitioners' representatives. Set out below is a summary of the questions received and responses made at the Community Meeting:

- Leah Sanders of the Landsdowne community presented information on behalf of the neighborhood group that was brought together and organized after the first Community Meeting in order to solicit feedback from neighborhoods that surround the Site and provide input to the Petitioners. Ms. Sanders gave the background and history of how she became involved with the neighborhood group and then explained how the neighborhood group organized and started meeting with each other and the Petitioners to discuss the rezoning site plan. Ms. Sanders stated that the major issues the neighborhood group feels like must be addressed are building height, traffic, and pedestrian safety. The results of the online survey conducted by the neighborhood group, which are attached hereto as Exhibit G, were then discussed in detail by Ms. Sanders.
- One neighbor commented that other neighborhoods, including the Greyllyn and Creola neighborhoods, should be included in the organized neighborhood group providing feedback. Ms. Sanders agreed and welcomed the representatives of those neighborhoods to contact her using the previously mentioned email address.
- A question was raised regarding how much taller the buildings will be compared to what's already allowed by right in R-3. The Petitioners explained that it varies, but the maximum height by right in R-3 is 40 ft. and the buildings that front Jefferson Drive will only be roughly 8 ft. taller at the setback (i.e., 48 ft. at the 40 ft. setback).
- A neighbor then asked if the plan has gone through urban design review by the City, which the City staff answered that it partially has gone through such review. The neighbor expressed an opinion that the drawing on the PowerPoint being shown at the meeting was not sufficient for approval. The Petitioners responded by stating that the drawing on the PowerPoint was a rough sketch to give the attendees a sense of the changes being made, but the actual site plan and renderings are being worked on right now by the Petitioners' representatives and will be much more thorough and complete when resubmitted.
- A question was raised for City staff about when the rezoning process officially begins. City staff answered that the unofficial beginning is the pre-submittal meeting where the City discusses the proposed rezoning plan with the applicant/petitioner, and what to consider before submitting. The official beginning is when the rezoning application/petition is actually submitted to the City.
- In response to questions by the attendees concerning wetlands and stormwater on the Site, the Petitioners explained that they are required by the City to analyze both. The Petitioners have already confirmed that there are no wetlands on the Site and plan to analyze stormwater runoff (and other stormwater features) as part of the City's approval process. The Petitioners will be constructing stormwater facilities off-Site, but close by, including detention ponds. Also, the Petitioners confirmed that no development will occur within the stream buffers.
- A neighbor asked about the plans for Armstrong Drive now that the Petitioners do not plan to construct a entrance/exit onto Jefferson Drive. The Petitioners explained that they have no plans to change the way Armstrong Drive is used or accessed. However, it is believed that most residents (as well as EMS and service vehicles) will use the two access streets/driveways off Providence Road.
- Some neighbors expressed concern over removing trees along Jefferson Drive and the concern with the number of buildings and the height of such buildings. The Petitioners explained that the revised site plan seemed like a fair compromise on building height and density issues.

- In response to a question about whether this Site is part of a water works improvement program, the Petitioners stated that they were unaware whether there is such a project at the Site, but they plan to look into it. Also, City staff explained that the Petitioners are currently in the entitlement process, and that the Petitioners still need to go through the building permit process, which is where compliance with water projects and stormwater regulations occurs. Further, the Petitioners announced that they plan to conduct a downstream analysis for the project.
- A neighbor asked what other cities Aldersgate operates a retirement community in and Ms. Pugh stated the only other Aldersgate facility or community like the one proposed here is located off Shamrock Drive in Charlotte.
- A few neighbors asked about providing input during the rezoning process and whether the materials and PowerPoints presented at the meetings be available online. The Petitioners stated that there will continue to be opportunities for input along the way, including in front of City Council at the public hearing, and that the goal of all the meetings held by the Petitioners, some of which are required and some of which are not, is to listen to input and make changes that are accommodating to the neighbors. For example, the Petitioners have revised the site plan to show some of the buildings at 3 stories over parking for two of the Independent Living buildings instead of 5 stories over parking as shown on the original submittal. The Petitioners also mentioned that the City has a website with all the rezoning information, which is www.rezoning.org, and all of Aldersgate's materials and PowerPoints presented at a community meeting will be available there after May 13th (when Aldersgate intends to submit its amended rezoning application and site plan).
- In response to questions about topography and views from Jefferson Drive, Matt Langston explained that the Site falls off in grade from left to right when looking at the site plan for the project, and he detailed the physical features of the Site. Mr. Langston explained that while the maximum height is 48 ft. at the 40 ft. setback along the Site's Jefferson Drive frontage, the topography and other Site features (e.g., existing and new trees) will screen the views of the building a lot.
- A question was raised regarding the budget for the project and what kind of profit Aldersgate is going to make. Suzanne Pugh explained that Aldersgate is a non-profit and only aims for 5-7% profit. She estimated that the project budget is roughly 60 million dollars.
- A few neighbors asked about the setbacks for the project and trees/plantings within the setback, Matt Langston explained that there will be a 40 foot setback as measured from the existing public right-of-way along the Site's Jefferson Drive frontage, as well as from the proposed right-of-way along the Site's Providence Road frontage. Mr. Langston explained that the Petitioners intend to plant evergreen trees within the setback along the Site's Jefferson Drive frontage, and that such evergreen trees may be clustered to provide screening for proposed buildings. Mr. Langston also explained that the Petitioners are meandering the sidewalk along the Site's Jefferson Drive frontage to preserve existing trees.
- In response to questions about traffic and parking, it was explained that minimum parking is required by the Ordinance and that residents may have cars, but the typical resident (75-85 years old) will use such vehicles only infrequently due to their age and due to the internal capabilities of the development, which will allow such residents to get to Shalom Park via walking, golf cart, etc. As the trip generation numbers indicate, traffic and congestion will be minimal with the proposed project. A neighbor asked if the trip generation numbers include service and EMS vehicles, which they do. The Petitioners explained, however, that such trips will be negligible.
- Several neighbors expressed support for this project because of the need for this type of continuing care retirement community in this area and because the Petitioners have expressed a willingness and desire to work

with the neighbors and stakeholders to develop a community that all types of people can appreciate and enjoy.

- There were several alternatives to the design of the project suggested by neighbors, including locating some of the buildings on vacant land to the south of the Site, reducing the number of units, and flipping the assisted living/memory care (AL/MC) building and one of the IL buildings, and removing a building instead of decreasing the number of stories. The Petitioners stated that they would consider such suggestions, but some the ideas were not feasible. It was explained that the terrain of the property to the South of the Site is not really buildable because of wetlands and bottom lands. Also, the AL/MC building has a larger footprint than the other buildings and does not really fit into the area suggested. Finally, it was explained that the number of units and buildings have been carefully considered and designed to make the project work, and the number of units has already been reduced at neighbors' requests.
- In response to questions about the construction entrance for the project, Matt Langston emphasized that he has been to the Site and doesn't foresee have construction vehicles entering or exiting off Jefferson unless such construction is occurring on Jefferson Drive specifically. Rather, the construction entrance/exit will be located off Providence Road. Mr. Langston also explained that there will measures taken to prevent dirt/silt/mud from being tracked onto Providence Road (e.g., gravel drives).
- A neighbor asked if there were any plans to operate skilled nursing on the Site. Suzanne Pugh explained there was not because it's almost impossible to get a Certificate of Need to do so and there is not room on the Site for such a facility.
- One neighbor stated that he opposed the project because the existing houses owned and rented by the Foundation for Shalom Park would have to be demolished.

The Petitioners informed the attendees that the Petitioners plan to submit the revised the rezoning application and site plan to the City based on the feedback from community meetings and City comments. Additionally, the Petitioners stated that they intend to continue to communicate with neighbors about the rezoning application and site plan and revise such documents as much as possible to accommodate neighbor concerns. Boris Henderson thanked everyone for attending the meeting and adjourned the Community Meeting at 8:59 p.m.

Respectfully submitted, this 13th day of May, 2019.

NOTICE TO INTERESTED PARTIES OF ADDITIONAL COMMUNITY MEETING

Subject: Community Meeting – Rezoning Petition filed by Aldersgate at Shalom Park, Inc. to rezone approximately 11.02 acres located on the corner of Jefferson Drive and Providence Road to accommodate the development of a life plan community containing independent and dependent living facilities that are designed to serve the aged, elderly, and disabled.

Date and Time of Meeting: May 9, 2019 at 6:30 p.m.

Place of Meeting: Gorelick Hall at Shalom Park
5007 Providence Road, Building A
Charlotte, North Carolina 28226

Petitioner: Aldersgate at Shalom Park, Inc.

Petition No.: 2019-040

We are assisting Aldersgate at Shalom Park, Inc. (the “Petitioner”) in connection with a Rezoning Petition it has filed with the City of Charlotte Planning Department seeking to rezone approximately 11.02 acres located on the corner of Jefferson Drive and Providence Road (the “Site”) from the R-3 and R-I zoning districts to the INST(CD) and INST. zoning districts. The purpose of the rezoning is to accommodate the development of a life plan community containing independent and dependent living facilities that are designed to serve the aged, elderly, and disabled.

While the Petitioner has already held a Community Meeting on this Rezoning Petition for the purpose of discussing this rezoning proposal with nearby property owners and organizations, as required by the City of Charlotte Zoning Ordinance, the Petitioner wishes to hold an additional Community Meeting that is not required by the City of Charlotte Zoning Ordinance in order to hear more from the community and discuss revisions to the Rezoning Petition. There will be City of Charlotte staff in attendance to answer questions as well.

Accordingly, on behalf of the Petitioner, we give you notice that representatives of the Petitioner will hold an Additional Community Meeting regarding this Rezoning Petition on May 9, 2019, at 6:30 p.m. at Gorelick Hall at Shalom Park, 5007 Providence Road, Building A, Charlotte, NC 28226. The Petitioner's representatives look forward to sharing the revisions and pending items for discussion regarding this Rezoning Petition with you and to answering any questions you may have with respect to this Rezoning Petition.

In the meantime, should you have any questions or comments about this matter, please call Nick Tosco at (704) 342-5275.

cc: Tariq Bokhari, City Councilmember District 6
Taiwo Jaiyeoba, Planning Director

Meetings with the City

- Discussed traffic/pedestrian issues extensively
- Discussed building height
- Actively working to revise the plans
- Second submittal scheduled for Monday, 5/13

Building Height & Site Plan Changes

- Proposed changes to building height (3@4 over parking, 2@3 over parking)
 - Max height adjacent to Jefferson of 48' (8' over R-3)
- Density reduction from 150 units to 126
- Jefferson Drive connection removed

PLANNING, DESIGN & DEVELOPMENT

Creating Great Places
for Our Community

Rezoning

Definitions

- Zoning determines how parcels of land can be used and the standards related to their use.
- **Rezoning:** a means for amending the zoning classification of one or more parcels of land.
- Typically submitted by an owner that wants to use their land in a way that does not conform to the current zoning.

Conventional Rezoning	Conditional Rezoning
<ul style="list-style-type: none">• Property owner signature not required	<ul style="list-style-type: none">• Property owner signature required by State Law
<ul style="list-style-type: none">• No site plan submittal	<ul style="list-style-type: none">• Site plan submittal required
<ul style="list-style-type: none">• No community meeting required	<ul style="list-style-type: none">• Community meeting and report required
<ul style="list-style-type: none">• Not tied to specific uses/proposal	<ul style="list-style-type: none">• Commitment to specific uses and proposal

Rezoning Process

Creating Great Places for Our Community

Collaborating with community partners • Guiding growth with innovative and creative solutions
Sustaining our natural environment and community character • Designing vibrant and inclusive places

1 Interest is shown in rezoning the property

- Property is being proposed to be developed or used in a way that does not conform with the current zoning of the property
- Pre-application conference with staff
- Submittal of application, site plans and filing fee
- Rezoning signs are put up, adjoining property owners, neighborhood leaders and agencies are notified

Understanding the steps in the Rezoning Process

2 Community provides feedback to applicant

- Petitioner holds Community Meeting (for Conditional Rezoning)

3 Analysis → Recommendation → Decision

- "Pre Hearing" Staff Analysis and Recommendation
- Public Hearing
- Zoning Committee Recommendation
- City Council Decision

Staff recommendation takes into account the following:

- Consistency with adopted plans and policies
- Context
- Community benefit
 - ✓ Revitalization
 - ✓ Growth catalyst
 - ✓ Set the standard/raising the bar
- Urban design
- Site plan notes
- Infrastructure
- Environment
- Compliance with ordinances

Staff Analysis

How to Stay Involved

rezoning.org

- Attend community meetings when applicable (typically conditional rezoning only)
 - If you see a posted sign, or receive a notice letter visit our website rezoning.org to learn more
 - Contact staff with any questions or to get more information
 - Attend public hearings with the City Council (typically the 3rd Monday of each month for Rezoning items)
-

Respondent Comments:

Pedestrian safety is my dominant concern. Jefferson Drive is narrow and already heavily traveled. It's only a matter of time until we lose a child or a mom with a stroller. I would be OK with leaving Armstrong open if we had sidewalks Providence to PDS.

No sidewalks throughout the neighborhood is a major problem, particularly on Preston Ln with JCC members cutting through to Sardis. I really think the developer should install sidewalks (at least on that street) if they don't close Armstrong Drive.

The project as proposed is not in the least in keeping with the existing neighborhood and will endanger lives and decrease neighborhood property values.

They don't stop at stop signs now. Another traffic light would be a disaster.

-continued-

LANDSLOWNE CIVIC LEAGUE

Emergency vehicles access and needs to enlarge current CFD station on Sardis Lane

We are a suburban neighborhood!! Or we were ! Don't want tall ugly city buildings near home ! They belong downtown!

Aldersgate and the JCC provide excellent services to seniors and I support the project. It would be ideal for it to fit seamlessly into our communities and facilitate more non-vehicle transportation not reduce it.

I'm totally against this project, though I've know the J owns residential properties on Jefferson, I never in a million years thought they'd try to rezone it Institutional, I think though Aldersgate is a wonderful place, they should not do it by encroaching into a single family neighborhood, if this fronted Providence, it would fit in just fine, but not going down into a neighborhood, I find it unacceptable, if this project is done, no single family neighborhood will be safe from rezoning

It is inevitable that the land will be developed. The question is by whom. The JCC has been a good neighbor; their property is pretty and the JCC is an asset to the neighborhood. Aldersgate will work with us by lowering the height of the buildings, dropping the Jeff Dr entrance and maintaining the mature trees lining Jefferson. If the land is sold to other private developers we risk that they would NOT preserve trees, and could be 27 houses with a road onto Prov and Jeff. Pick your battles.

This is a quiet residential neighborhood. No new access points on Jefferson. Is the parking at ground level or below ground? Building height is a major concern.

The roads on Jefferson, Lansing and Preston are very narrow. We have alot of issues just with the Providence Day traffic in the mornings thru back gate. It is very dangerous for walking. I used to walk every morning at 7 am but it became hazardous about 4 years ago. Please don't do it. We do not have the roads in this tiny community to take on the traffic.

I appreciate the need that Aldersgate/JCC are attempting to address. I also believe that they are sincerely attempting to mitigate neighborhood concerns. I am especially impressed with their "Chevron" design rather than buildings with continuous walls along Jefferson Rd.

I think part of this as well, from a value standpoint is that the area is staring to look like the retirement section of town (assisted living across from Lansdowne, assisted living in Lansdowne, new developments in Cotswold etc. It is too much of this type of development in one area. This in addition to the proposed height and traffic impact. We are also getting a bigger school in Lansdowne soon wich will increase traffic as well.

I understand we can stop business from growing or trying to make money, but there is a right way to go about this and focusing the buildings towards Providence and away from the residential interior of our Neighborhood via Jefferson is the right way to handle.

I expect this will be a well done project that will not negatively impact property values.

If there were traffic lights at our entrances, it would be beneficial!!!!

Limiting the project to 3 floors and not building the access from Jefferson Drive are our biggest issues and am willing to fight for those changes. Hiring a lawyer should be a priority and willing to contribute. D. Rauch 6035 Lansing.
I would like to see a maximum of two stories on the buildings and very restricted use of any Jefferson Drive entrance or exit.

Something like Aldersgate would be a better alternative than regular multi-family housing which would likely be the other alternative for a parcel that size.

Aldersgate is a very high quality CCRC. We have looked into the Shamrock facility for ourselves, but will stay where we are for now. I believe mixed use housing WILL come in the near future and I'd rather have Aldersgate than just about any other use right now. While we do not live next door, I think there are good examples of well done neighborhood mixes, such as Sharon Towers. I understand the concerns, and hope good faith negotiations will yield good results.

I know this is "progress" but, I also think this project will ruin Jefferson Park neighborhood property values, safety and increase traffic on an already bust street.

The Jefferson Drive entrance to Shalom Park is used by our family to access by car the JCC.

-continued-

LANSDOWNE CIVIC LEAGUE

I feel that the units SHOULD NOT be any higher than the surrounding houses. If one says '2 stories above parking', the building could actually come out 3 stories high.

I encourage neighbors to visit the Aldersgate campus on Shamrock. It is a quiet place. Senior living facilities have less traffic than regular apartment or condo complexes. I also expect that the folks at Shalom Park will build something that is aesthetically pleasing. I'd rather have a Shalom Park/Aldersgate facility than an apartment with 300 20–30 year olds living there.

I appreciate the efforts to have a coordinated response

I appreciate the "community" effort and reasonable approach to addressing the issues the LCL is putting forth. Well done!!

On a side note, I'm surprised to hear many of the same people who want a traffic light put in at Folger or Lansdowne be the voices concerned about additional traffic in the neighborhood. A traffic light would drastically increase traffic through Lansdowne. Just a side note, again thank you for working to keep our neighborhood great!!

We need consensus, practicality and reasonable compromise to avoid an unmitigated disaster.

It is time for the Jewish community to have a dedicated home for their aged. Thank you!

For every tree they cut, they need to plant a new one. Most cities have this regulation but actually require planting double the number of trees they cut. The aesthetics of the area is the greenery. This can not be lost.

The land will be developed and this is a better use than many. I do think we should work to minimize the impact to the neighbors on Jefferson. I really support closing the gates and additional sidewalks.

I use the JCC several times a week so I would very strongly object to car traffic being restricted on Armstrong. Doing so would take away community access to a wonderful resource.

I am most concerned about building height. Is the parking level surface level or underground? It should be underground to reduce overall height otherwise 2 stories on top of surface parking equates to 3 stories...NOT Acceptable!

How many stories is parking and what is the proposed overall height of the building? Is the parking subterranean or above ground? Buildings should be no higher than the buildings around it and not be higher than the tree canopy.

There are presently so many accidents happening from traffic exiting out of Lansdowne onto Providence Road as it is now. I can't imagine have 320 additional cars in and out of the neighborhood. I'm concerned about more accidents and pedestrian safety. I'm for taking care of the elderly, but also limiting the number of buildings and stories. Thank you

What will be the construction hours for the project (8am - 5pm?). Will there be construction work on Saturdays and/or Sundays? What is the expected time frame for construction start to finish?

The only time I cut through the JCC to access their traffic light is when our exit onto Providence is backed up with cars leaving the JCC to access Providence Road via Jefferson Dr. That should not be happening!

I believe that Jefferson Drive is a residential road. The many vehicles driving to the wonderful facilities of the JCC should use the Providence Road access. If that one access is not enough, then other accesses to Providence Road should be built.

I'm disappointed in the lack of communication to those that would be directly impacted by this project

I'm concerned that installing more sidewalks within the neighborhood would lessen property value for the homes who's yards would be impacted. This would only be a way to appease beliefs about safety secondary to increased traffic from Aldersgate. If we minimize through traffic within the neighborhood we wouldn't need additional sidewalks. Should have gated Lansdowne 20 years ago.

Our family is supportive of the project, but we are concerned about the impact to the neighborhood and pedestrian safety. We wish that the plans for the new development will incorporate changes to reduce traffic on Jefferson Drive.

LANSDOWNE CIVIC LEAGUE

Neighborhood covenants/restrictions are vital to a neighborhood. Lansdowne and other neighborhoods surrounding Shalom Park should value and preserve their covenants/restrictions to protect against similar attempts at rezoning in the future. Neglecting and minimizing the importance of enforcing our covenants today could be problematic in the future.

I am not against the project per se but am against it as presently configured. The land use could be better utilized eliminating the need for a second Jefferson Drive entrance as well as placing smaller buildings across the property addressing building height concerns.

Privacy of our home being disturbed is a serious concern

Please address increased need for fire and medical resources. These new residents will be calling 911 and the area already has 2 nursing/elder care facilities within site of this new proposed development!!!! We need more medic resources to address the medical needs of elderly.

I support the proposed project. It is a less disruptive use than apartments, town homes, condos, school, etc. I believe it will have a positive impact on home values because it will be a quality product and will provide a needed service. I am concerned about traffic in Charlotte and in the neighborhood, but I think traffic problems arise more from apartments, town homes, condos, school, or other commercial uses than from retirement communities. I have no personal ties to the developer.

It is a massive expansion on the Shalom Park campus that will have significant impact on the surrounding neighborhood in many areas including aesthetics, traffic increases and pedestrian risks, and general increased noise level.

The proposed Aldersgate development should use the existing JCC/Providence Road entrance/signalized intersection as the primary means of ingress and egress to the project.

There should be more notice from the city and Shalom Park.

I hope our voices will be heard, but, I fear the project has already been approved by members of the city council.

I would require that in return for support of the project that one traffic light be installed at Providence / Folger or Providence/ lansdowne at the beginning of development (my concern is Shalom will push for a light at Providence/Jefferson!!!

Re-zoning to R-1 Institutional opens the doorway for more R-1 developments in this area , sets a new precedent

Our only request, and this may be better directed at the city rather than this project, would be to soften the right turn on to Jefferson when coming in from Providence Road travelling north. It's more than 90 degrees and you almost have to come to a full stop on Providence road to make that turn, risking getting rear ended or swinging into oncoming traffic on Jefferson.

I would support the use of Armstrong Dr for emergency vehicles and pedestrians/bicycles only, but NOT for service vehicles. I would also support a second entrance off Jefferson Dr if restricted in the same way - NO service vehicles.

Thanks to neighbors for organizing this response

The neighborhood was misled (lied to) by the JCC re: the use of the Armstrong Dr. entrance when their development was first announced. I feel we will be misled (lied to) again by this current proposal. They act like they own all of Jefferson Dr. and can do what they want. Shame!

Need a light at Folger or Lansdowne

Maintenance over time. Landscaping to reduce visibility

The project is too dense for the area, and environmental issues such as storm water run off and wet land concerns are huge. Reducing building heights will not address these issues...a reduction in the number of buildings is necessary. Additionally, left turns in and out of Jefferson need to be prohibited...Greylyn Dr. residents already may not exit our street...trapped, no other exit but to Providence Rd.

LANSDOWNE CIVIC LEAGUE

I am concerned this was not advertised, it must have been planned for a long time, yet we have lived here for two years and just heard about it. I am a JCC member and use the Jefferson Drive entrance to come and go from my home. I have enjoyed being a member there, however when I saw the rendering and realized by my count at least 6 homes will be removed it seems excessive. Thank you.

I am not hugely concerned about the project impacting our neighborhood, and small streets, but more concerned about the delays and congestion it could cause on Providence Rd. during construction.

Jefferson Drive should be widened

Our support for sidewalks hinges on tree removal, we do NOT want more tree removal. The gutting of habitats & greenery for construction is bad enough without destroying more trees for sidewalks. We support this project if sensitive to height, impact on existing residents, & no increasing traffic patterns on Jefferson & other back roads. There is a dedicated traffic light to the JCC on Providence, so there is no need to use Jefferson. The cut-through traffic at Armstrong is already too much.

I believe there is a right of way on Lansdowne to the JCC. If that is true will it be used? Does it exist?

Concerned re water run off, environmental impact and noise and light pollution.

There is already too much traffic on Jefferson! Kids and dogs are unsafe. Need a traffic light at Jefferson and close off auto traffic to Jefferson entrance to JCC.

The traffic throughout the residential neighborhood is already a concern because it is used as a cut through for the JCC and Providence Rd. The new proposed project would increase an already concerning issue. We have two small children in our home and concerned for their safety and privacy in our home.

Regarding concerns of traffic, these neighbors should also be involved in talks with Providence Day School about the rear entrance off Lansing traffic as it impacts Lansdowne, Lansing, Jefferson, Preston. That entrance backs up traffic in the AM and cars traveling much too fast for the neighborhood.

To help decrease traffic flow, would be interested in the city installing a turnaround area for NB Providence traffic and restrict left turns from Lansdowne / Folger during rush hour. This would force traffic to turn right, then have plenty of turnaround space to go South once there is a break in traffic. I am not interested in another stop light on Providence. That will just encourage more traffic.

All accesses should be added from Providence Road. There are multiple commercial residential buildings with main and servicing entrances all exiting to Providence Rd. All other solutions impact residential neighborhood.

No, just glad I don't own a million dollar home on Jefferson

Close Armstrong drive to all vehicle traffic

Yes, traffic is bad enough in neighborhood with Providence Day and new homes being built and construction traffic.

I would like the Armstrong Dr entrance/exit to be locked gated or at least with an arm, and used only for service and emergencies. As soon as any first responders are called the gates could be opened immediately, not waiting for arrival of vehicles. Gates open for special events and open to pedestrian and bicycle traffic at all times. Plantation Estates monitors one of its gates this way. All other traffic could use the 3 entrance/exits on Providence Rd.

Our neighborhood streets are barely wide enough for 2 cars to pass. Just the construction vehicles from new home construction and the frequent detours for problems on Providence and Sardis make driving and walking treacherous. Construction vehicles (including workers' private vehicles) for this large project should be banned from neighborhood parking. The main feeder streets into the neighborhood (like Jefferson and Preston) need to be widened to safely accommodate increased traffic demands.

I think some day I may live there. Let's make this work for everyone!

Jefferson already congested and dangerous for pedestrians negative impact on property values, environmental problems, noise, stresses infrastructure ex. city water flow. Additional Road onto Jefferson greatly impact traffic flow

-continued-

LANSDOWNE CIVIC LEAGUE

The volume of traffic on Providence Rd is excessive already making it difficult to get out of the neighborhood as it is. Another high rise structure will introduce more traffic that the roads cannot support today.

Totally inappropriate commercial project in residential neighborhood.

1. There is a stream/creek between Temple Israel and the houses to be demolished on Jefferson Dr. Not sure what the impact would be to close it and whether there is enough focus on that.
2. I think initial 5 story proposal was just a part of their strategy where they can knock down 1 story off the plan and claim that they are being reasonable.
3. The current traffic to Armstrong drive via Jefferson is already high and speed limit is frequently flouted. It should be restricted.
