Comments:

Summary: Water and sewer service is accessible for this rezoning boundary.

Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 8-inch water distribution main located along Wilgrove Mint Hill Road.

Charlotte Water has sanitary sewer system infrastructure accessible for the rezoning boundary via an existing 8-inch gravity sewer main located along Wilgrove Mint Hill Road.

Development is encouraged to contact Installation Development Services at (704) 336-5499 to review service connection design requirements and City Ordinances (e.g., backflow, separate meter Ordinance, public/private pipeline extensions). Comments: Submit application to the Capacity Assurance Program. Depending on the required public street network, this site may need to extend public water/sewer to serve their site. If adding an additional lane over our water main on Harrisburg Road, you will need to provide us with soft dig so we can verify we have at least 3' of cover. If there is not sufficient cover, relocation of the water main will be required. Will need to send plans to Charlotte Water for private water permitting (if applicable). Will need to send plans to NCDEQ for private sewer permitting (if applicable).

Reservation of sanitary sewer system capacity through the Charlotte Water's Capacity Assurance Program is the responsibility of the customer/development. Contact the New Services Group at (704) 432-2854 for further information on reserving capacity up to 24 months.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. The findings do not imply available capacity in water and sanitary sewer lines, pump stations, or treatment facilities. Reservation of capacity is achieved through the Charlotte Water's Capacity Assurance Program.
