

ORDINANCE NO.

**AN ORDINANCE AMENDING APPENDIX A
OF THE CITY CODE –ZONING ORDINANCE**

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF CHARLOTTE:

Section 1. Appendix A, "Zoning" of the Code of the City of Charlotte is hereby amended as follows:

A. CHAPTER 12. DEVELOPMENT STANDARDS OF GENERAL APPLICABILITY

1. PART 3: BUFFERS AND SCREENING

- a. Add a new section 12.308, titled, "Screening requirements when a development does not proposed two tiers of buildable lots" that adds requirements for landscaped easements. [Note: underlined text represents new additions to the Zoning Ordinance]

Section 12.308. Screening requirements when a development does not propose two tiers of buildable lots.

The purpose of this section is to establish requirements for landscape screening on residential reverse frontage lots to provide a visual screen between the use and the street which will not provide direct vehicular access. Any existing residential building, which exists prior to the effective date of this section, will not be subject to these requirements when undergoing any addition, expansion, renovation, razing, or rebuilding. These requirements will not be applicable if the North Carolina Department of Transportation (NCDOT) provides a noise abatement or screening wall, or if the Charlotte Department of Transportation (CDOT) provides a wall as part of a major thoroughfare widening. These requirements are applicable along major and minor thoroughfares, as well as along major collectors that function as a minor arterial, whether or not if they are on the thoroughfare maps. The requirements are as follows:

1. A deed restricted, recorded, common open space strip that is a minimum of 30' in width, shall be provided for reverse frontage lots, and noted as "Common Open Space". The open space shall be located adjacent to the public street right-of-way, on the lot frontage side that will not have direct vehicular access to the abutting street. The rear yard shall be measured from the inside edge of the 30' common open space strip. The following requirements shall be met:

- a. The common open space shall contain a berm of a minimum of 4' in height, with a maximum slope of 3:1 as measured from the exterior property line. In addition, trees and shrubs shall be provided on the berm with a minimum of 6 trees (of which 25% must be evergreen) and 20 shrubs per 100 linear feet.
 - b. In lieu of the berm, a minimum wall or fence 4' in height may be provided within the 30' common open space strip and planted with a minimum of 6 trees (of which 25% must be evergreen) and 20 shrubs per 100 linear feet.
 - c. A tree save area may be provided in lieu of a berm, fence, or wall if the species within the 30' common open space strip meet the minimum planting requirements of 6 trees (of which 25% must be evergreen) and 20 shrubs per 100 linear feet.
 - d. If the proposed planting or berm can not fit within 30' then the common open space strip must be increased accordingly. Trees and shrubs will not increase with greater common open space width. The rear yard will still be measured from the edge of the common open space strip.
 - e. Maintenance of the common open space strip shall be the responsibility of the homeowner's association.
 - f. Principal and accessory structures shall not be located in the easement area.
 - g. A minimum rear yard of 20' is required measured from the interior edge of the common open space strip.
2. If common open space cannot be provided, or there is no home-owner association, then the lots must be increased in depth a minimum 30' with the 30' area recorded as a landscaped easement. The following requirements shall be met:
- a. The easement shall be a minimum of 30' in width, and shall contain a berm of a minimum of 4' in height, with a maximum slope of 3:1 as measured from the exterior property line. In addition, trees

and shrubs shall be provided on the berm with a minimum of 6 trees (of which 25% must be evergreen) and 20 shrubs per 100 linear feet.

- b. In lieu of the berm, a minimum wall or fence 4' in height may be provided within the 30' easement and planted with a minimum of 6 trees (of which 25% must be evergreen) and 20 shrubs per 100 linear feet.
- c. A tree save area may be provided in lieu of a berm, fence, or wall if the species within the 30' easement meet the minimum planting requirements of 6 trees (of which 25% must be evergreen) and 20 shrubs per 100 linear feet.
- d. If the proposed planting or berm can not fit within 30' then the easement must be increased accordingly. Trees and shrubs will not increase with greater easement width. The rear yard will still be measured from the edge of the easement.
- e. Maintenance of the landscaped easement shall be the responsibility of the property owner.
- f. Principal and accessory structures shall not be located in the easement area.
- g. A minimum building setback of 20' is required measured from the interior edge of the easement.

Section 2. That this ordinance shall become effective upon its adoption.

Approved as to form:

City Attorney

I, _____, City Clerk of the City of Charlotte, North Carolina, DO HEREBY CERTIFY that the foregoing is a true and exact copy of an Ordinance adopted by the City Council of the City of Charlotte, North Carolina, in regular session convened on the ____ day of _____, 2006, the reference having been made in Minute Book _____, and recorded in full in Ordinance Book _____, Page(s)_____.

WITNESS my hand and the corporate seal of the City of Charlotte, North Carolina, this ____ day of _____, 2006.
