AMOUNT OF OPEN SPACE	PER ZONING ORDINANCE (1 SF / 100 GSF OF PRIMARY USE)

REZONING PETITION NO. xxxx-xxx DEVELOPMENT STANDARDS

1. General Provisions

The purpose of this rezoning request is to replace the various existing entitlements affecting the Site in order to allow the development of an integrated mixed use development that will provide connectivity between Morehead Street and Harding Place.

These Development Standards, Sheet RZ-1, and RZ-2 form the "Rezoning Plan" associated with a Rezoning Application filed by FIVE Morehead, LLC seeking rezoning for property located at the southeastern quadrant of the intersection of Morehead Street and Kenilworth Avenue (the "Site").

Development of the Site will be governed by Sheet RZ-1, Sheet RZ-2, these Development Standards and the applicable provisions of the City of Charlotte Zoning Ordinance (the "Ordinance").

Unless Sheet RZ-1, Sheet RZ-2 or these Development Standards establish more stringent standards, the regulations established under the Ordinance for the MUDD Zoning District shall govern all development taking place on the Site.

If approved, modifications to this Rezoning Plan may be allowed subject to the provisions of Section 6.207 of the Ordinance.

2. MUDD-O Optional Provisions

The Petitioner proposes to utilize the MUDD-O provisions of the Ordinance in order to accommodate the following:

- Water quality and stormwater detention facilities located within setback areas and beneath sidewalks. However, such facilities may not be located with the right-of-way.
- Parking and maneuvering within the porte-cochere area along Morehead Street as generally depicted on Sheet RZ-1.
- A 16 foot minimum setback from the back of the new curb line along Kenilworth Avenue as generally depicted on RZ-1. A 14 foot minimum setback from the existing back of curb along Harding Place as generally depicted on Sheet RZ-1.
- Up to 440 square feet of attached signage along each of the Morehead Street and Kenilworth Avenue frontages.
- One drive-through service window.
- Building access features extending into setback areas as generally depicted on Sheet RZ-1.

3. Permitted Uses and Maximum Development

The Site may be developed with up to 380 residential dwelling units, 10,000 square feet of residential supportive services, and up to 15,000 square feet of commercial uses, including but not limited to a retail pharmacy with a drive-through service window. Any accessory uses permitted in the MUDD zoning district shall also be permitted.

4. Transportation

- Petitioner shall relocate the existing curb line along Kenilworth Avenue to accommodate a four (4) foot bicycle lane. The contemplated location of the proposed new curb line is generally depicted on RZ-1.
- Petitioner shall dedicate and convey by plat or quitclaim deed to CDOT, where owned by the Petitioner and where not already existing, that portion of such additional right-of-way along the Site's frontage of Kenilworth as generally depicted on RZ-1.
- To the extent that sidewalks cannot be installed within the existing right-of-way along Kenilworth Avenue and Harding Place, Petitioner agrees to convey to CDOT, a nonexclusive easement to an area of up to eight (8) feet in width along Kenilworth Avenue for the installation of an eight (8) foot wide sidewalk, and along Harding Place a nonexclusive easement to an area of up to six (6) feet in width for the installation of a six (6) foot sidewalk; it being understood that the width of such easement shall be reduced by the right-of-way area in which the sidewalk can be located. Any such easement instrument shall be in a form mutually acceptable to the Petitioner and CDOT, as applicable, and shall permit the installation of the Petitioner's project signage and lighting and the encroachment of the same within the easement, so long as any encroachment maintains a nine (9) foot height clearance as measured from the sidewalk surface.
- Internal connectivity shall be provided in order to provide vehicular access through the Site from Morehead Street to Harding Place.
- With the exception of the porte-cochere area along Morehead Street, all off-street parking will be located in structured parking facilities located below the residential portions of the building.

5. Architectural Standards

- Exterior building materials may include brick, stone, cast stone, precast concrete, cementitious siding, stucco, EIFS, metal panel.
- The building constructed on the Site shall be substantially similar in all material respects to the elevations shown on RZ-2, provided however, that changes shall be permitted as long as the overall design intent is maintained.
- Petitioner shall provide a 26 foot setback along Morehead Street in order to be consistent with provisions of the Midtown Morehead Cherry Area Plan.
- Sideyards of not less than 10 feet shall be provided for residential levels above parking levels.
- A 5 foot rear yard shall be provided for parking levels.
- All setback commitments that exceed Ordinance standards shall apply to the ground level of the proposed building, above the ground level, window projections, balconies, architectural elements may encroach a maximum of 6' into said setbacks or yards for up to 25% of the building along that facade. The intent of this provision is to allow some building articulation, in order to avoid a stale or industrial, solid-face appearance.

- Along the eastern portion of the building facing the Monticello Terrace Condominiums, a ten foot side-yard shall be provided for residential levels above parking levels. Additionally, in this area landscaping will be provided; balconies will be inset or 'Juliet' balconies not to extend beyond the primary residential building face; other architectural elements (including but not limited to bay windows) may extend beyond the primary residential building face up to two (2) feet but will not be closer than eight (8) feet to the property line; patios or common spaces will not be permitted at grade the grade level of the building; and, the building will not be uplit along that elevation.
- With regard to the eastern portion of the building facing the Monticello Terrace Condominiums, Petitioner shall attempt to ensure that the project's residential windows do not "line up" with adjacent windows of the Monticello Terrace Condominium units. Additionally, venting for non-residential uses shall not be allowed along the portion of the building that faces the Monticello Terrace Condominiums.

6. Streetscape and Landscaping

- Petitioner shall provide eight (8) foot planting strips and eight (8) foot sidewalks along Morehead Street and Kenilworth Avenue.
- Petitioner shall provide an eight (8) foot planting strip and six (6) foot sidewalk along Harding Place.
- Petitioner shall rebuild the existing wall or construct a new wall between the Site and the Monticello Terrace Condominiums as well as the two portions of that wall that run perpendicular to the property line to a height of eight (8) feet minimum. The wall design, and additional landscaping, screening, and lighting will be developed in agreement with the Monticello Terrace Condominiums. Wall materials will be consistent to the existing wall construction (brick, stone, precast concrete, etc.). Landscaping will include tall maturing trees.
- Petitioner shall cause the existing overhead power lines at the rear of the Site to be relocated underground.

7. Environmental Features

- Development on the Site shall comply with the Post Construction Controls Ordinance.
- Petitioner has coordinated with the Urban Forestry Staff to develop a tree protection and preservation plan to ensure that the specified street trees located within the right-of-way of Morehead Street are protected and preserved during all phases on construction.

8. Parks, Greenways and Open Space

Open Spaces will be provided in areas generally depicted on RZ-1

9. Fire Protection

Fire protection shall be provided in conformity with the specifications of the Fire Marshal.

10. Signage

Optional provisions have been requested in order to accommodate signage sufficient to a development of this scale.

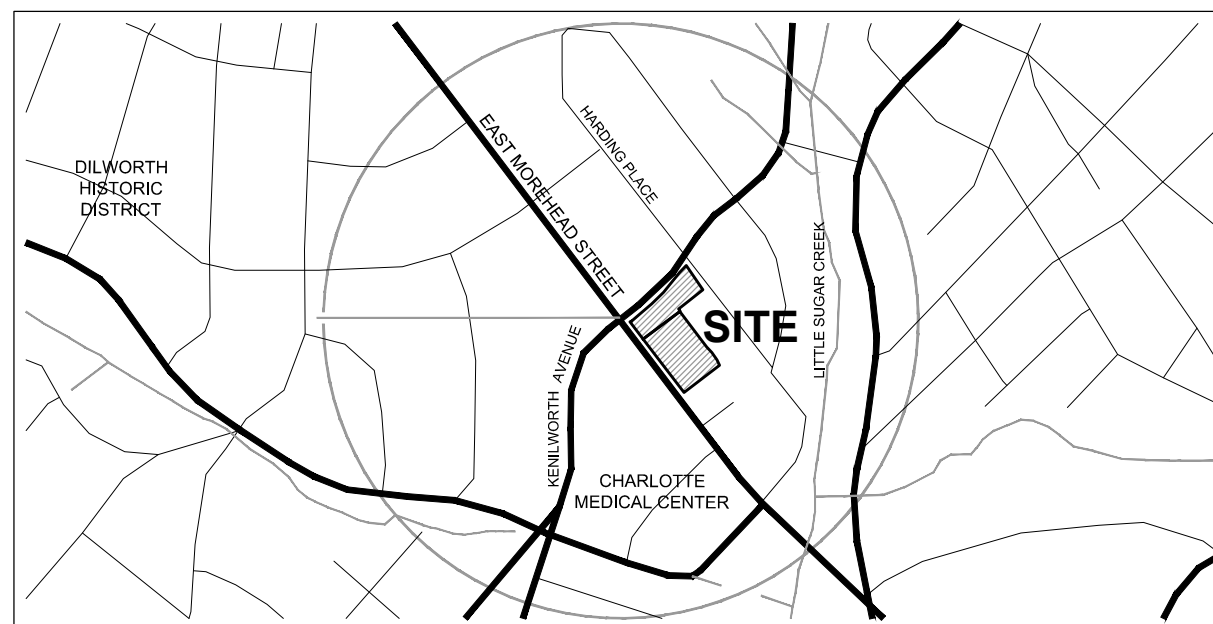

11. Lighting

- Freestanding lights shall not exceed 20 feet in height.
- On that portion of the building facing the Monticello Terrace Condominiums, no seasonal lighting shall be permitted on the exterior portions of individual residential units.
