Comments:

In relation to the parcels under review, Charlotte Water has water system availability for the rezoning boundary via existing 6-inch water distribution mains located along East 10th Street, Siegle Avenue, Jackson Avenue, and Prospect Street.

In relation to the parcels under review, Charlotte Water has sewer system availability for the rezoning boundary via existing 8-inch gravity sewer mains located along Siegle Avenue, Jackson Avenue, Central Avenue, and East 10th Street. There is also an existing 8-inch gravity sewer main running along the western edge of the rezoning boundary.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. It does not imply available capacity in lines, pump stations, or treatment facilities.
