CDOT's review of this rezoning petition is intended to ensure consistency with the Transportation Action Plan (TAP) which seeks to ensure that the City's transportation network supports current and future land uses and includes streets that provide safe and comfortable mobility for motorists, pedestrians, bicyclists, and transit users.

This document is primarily for communication to Planning Department staff as part of the overall City staff analysis of the rezoning petition and includes an overall summary of the case from a transportation perspective, information on trip generation, and resolved or outstanding site plan concerns. Additional advisory information about the driveway permit process is provided for information only.

Based on our review of the petition, we offer the following information for your consideration.

Transportation Summary

The site is located at the end of a local commercial street. The current site plan establishes a 75' building set back line as measured from the site's northern property line to accommodate a possible future extension of Tar Heel Road by others.

General Description

The site is located in an industrial center outside Route 4 with access from Tar Heel Rd. a local commercial street.

CDOT is requesting Tar Heel Rd. to be extended to the west as a local commercial/office narrow street with potential to connect to Toddville Rd. The extension of Tar Heel Rd. will provide needed east/west street network in this area.

The site was last rezoned per petition no. 1994-077.

Scenario	Land Use	Intensity	Trip Generation (vehicle trips/day)	Source
Existing Use	Vacant	N/A	0	Tax Records
Entitlement with Current Zoning	Parking Lot	N/A	0	RZ 1994-077
Proposed Zoning	Warehouse Office	25,500 sf 4,500 sf	215	Site Plan: 11-28-16

Trip Generation

Resolved Issues

 The petitioner should revise the site plan and add a conditional note to construct an extension of Tar Heel Road to the west along the site's northern property line and stub to parcel no. 05708108 with a local commercial/office narrow cross section (see CLDSM U-04). This local east/west public street is envisioned to ultimately connect into Toddville Rd. to provide needed east/west street network in this area in the future when tax parcel 05708108 redevelops. The petitioner needs to depict and label 55' or 41' minimum of public right of way and/or sidewalk utility easements to construct this street. The

Rezoning Transportation Analysis

petitioner has provided a 75' building setback line form the site's northern property line for future transportation improvements by others

- 2. The petitioner should revise the site plan to provide site access from the Tar Heel Rd. public road extension.
- 3. The petitioner should revise the site plan to add a note specifying dedication and fee simple conveyance of all rights of way to the City before the site's first building certificate of occupancy is issued. CDOT requests right of way set at 2' behind back of sidewalk.
- 4. The petitioner should revise the site plan to add a note specifying all transportation improvements will be approved and constructed before the site's first building certificate of occupancy is issued or phased per the site's development plan.

Outstanding Issues

None

Advisory Information

The following are requirements of the developer that must be satisfied prior to driveway permit approval. We recommend that the petitioner reflect these on the rezoning plan as-appropriate.

- 1. According to the City of Charlotte's Driveway Regulations, CDOT has the authority to regulate/approve all private street/driveway and public street connections to the right-of-way of a street under the regulatory jurisdiction of the City of Charlotte.
- 2. Adequate sight triangles must be reserved at the existing/proposed street entrance(s). Two 35' x 35' sight triangles (and two 10' x 70' sight triangles on North Carolina Department of Transportation on NCDOT maintained streets) are required for the entrance(s) to meet requirements. All proposed trees, berms, walls, fences, and/or identification signs must not interfere with sight distance at the entrance(s). Such items should be identified on the site plan.
- 3. The proposed driveway connection(s) to public streets will require a driveway permit(s) to be submitted to CDOT (and the North Carolina Department of Transportation on NCDOT maintained streets) for review and approval. The exact driveway location(s) and type/width of the driveway(s) will be determined by CDOT during the driveway permit process. The locations of the driveway(s) shown on the site plan are subject to change in order to align with driveway(s) on the opposite side of the street and comply with City Driveway Regulations and the City Tree Ordinance.
- 4. All proposed commercial driveway connections to a future public street will require a driveway permit to be submitted to CDOT for review and approval.
- 5. Any fence or wall constructed along or adjacent to any sidewalk or street right-of-way requires a certificate issued by CDOT.
- 6. A Right-of-Way Encroachment Agreement is required for the installation of any non-standard item(s) (irrigation systems, decorative concrete pavement, brick pavers, etc.) within a proposed/existing City maintained street right-of-way by a private individual, group, business, or homeowner's/business association. An encroachment agreement must be approved by CDOT prior to the construction/installation of the non-standard item(s). Contact CDOT for additional information concerning cost, submittal, and liability insurance coverage requirements.
