**Comments:**

Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 16-inch water transmission main located along Elm Lane and via an existing 6-inch water distribution main located along Camfield Street.

Charlotte Water currently does not have sewer system accessibility for the rezoning boundary under review. The closest available sewer main is approximately 120 feet east of the rezoning boundary on Millwright Lane. The applicant should contact Charlotte Water's New Services at (704) 432-2854 for more information regarding accessibility to sewer system connections.

Development is encouraged to contact Installation Development Services at (704) 336-5499 to review service connection design requirements and City Ordinances (e.g., backflow, separate meter Ordinance, public/private pipeline extensions). Comments: Submit application to the Capacity Assurance Program. Requires a sewer extension in the public street through our Donated Project section in Charlotte Water to serve the site. After you pass the public road R/W on Elm Lane, you will put a Private MH to start your private sewer collection system. Contact our New Services Department for water services. Send plans to Charlotte Water for private water permitting. Send plans to NCDEQ Mooresville Regional Office (704) 663-1699 for private sewer permitting.

Reservation of sanitary sewer system capacity through the Charlotte Water's Capacity Assurance Program is the responsibility of the customer/development. Contact the New Services Group at (704) 432-2854 for further information on reserving capacity up to 24 months.

This sheet indicates the findings of a cursory review of Utilities System Information for the presence or absence of public water or wastewater infrastructure only. The findings do not imply available capacity in water and sanitary sewer lines, pump stations, or treatment facilities. Reservation of capacity is achieved through the Charlotte Water's Capacity Assurance Program.
