Adopted Plan: Charlotte Area Transit System 2030 Transit Corridor System Plan

Adopted Plan: Independence Boulevard Area Plan

The site is approximately 190 feet from the CATS Locally Preferred Alternative Silver Line light rail corridor and in between the proposed Village Lake Station Area and Conference Drive Station Area. It does not appear the proposed alignment will impact this site. CATS will begin planning and design of the Silver Line corridor late 2019 to finalize the alignment and station locations.
